Active Reading**Section: How Population Change Is Measured**

Read the passage below and answer the questions that follow.

Over time, the growth rate of population change has been both very high and extremely inconsistent. In fact, almost every nation's policies, especially in the third world, were geared toward low birth rates, resulting in a dramatic drop in the average fertility rate. In fact, in population growth studies, the fact that in each year of child production, the mother's age is a factor that is not only a strong determinant of population growth, but also a strong determinant of the mother's age is a factor that is not only a strong determinant of the mother's age, but also a strong determinant of the mother's age.
