1. Which is a rule for the table below?

| Hours Worked | 1   | 3    | 4    | 7                       |
|--------------|-----|------|------|-------------------------|
| Money Earned | \$7 | \$21 | \$28 | \$ <input type="text"/> |

- A Add 7  
B Subtract 6  
C Multiply by 7  
D 49

2. Blake uses the rule "subtract 11" for her table. If she starts with 50, what is the next number?

- A 39  
B 49  
C 61  
D 44

3. **Writing to Explain** Look at the table below. Write about how you figure out a rule for the table. Then explain how to use your rule to find the two missing numbers. Finally, make up a pair of numbers that can go at the end of the table.

| Earned | \$21 | \$27 | \$12                 | \$18 | \$33                 | <input type="text"/> |
|--------|------|------|----------------------|------|----------------------|----------------------|
| Saved  | \$7  | \$9  | <input type="text"/> | \$6  | <input type="text"/> | <input type="text"/> |

The rule is

$\times 3$

$$7 \times 3 = 21$$

$$9 \times 3 = 27$$

**Central Conceptual Structure** Laura Christine Bofferding, 2011 In working with integers students have difficulties that may extend into middle school and even adulthood However even young children can display insights into negative numbers well before receiving formal instruction Using a pre test instruction post test design this study explores how 61 first graders reason about negative number properties and operations and how their understanding changes depending on the instruction they receive Results of the study indicate that children build on their existing whole number understanding to develop a central conceptual structure for integers Furthermore the process by which they extend their numerical central conceptual structure differs among students their initial schemas together with the form of the integer instruction influence how they reason about and solve integer addition and subtraction problems These results highlight the need to revisit the placement duration and content of integer instruction in curricula Closing the School Discipline Gap Daniel J. Losen, 2014-12-01

Educators remove over 3 45 million students from school annually for disciplinary reasons despite strong evidence that school suspension policies are harmful to students The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today s profound inequities in educational opportunity and outcomes Part I explores how suspensions flow along the lines of race gender and disability status Part II examines potential remedies that show great promise including a district wide approach in Cleveland Ohio aimed at social and emotional learning strategies Closing the School Discipline Gap is a call for action that focuses on an area in which public schools can and should make powerful improvements in a relatively short period of time **Press Summary - Illinois Information**
