

Variable	Method	How will it effect the rate of fall?
Surface area	This variable can be changed by making circles with different radius	The rate of decent should become faster as the surface area becomes smaller due to less air resistance
Mass	The mass of the parachute can be increased by adding extra weight	The larger the mass of the parachute the faster it should fall to the ground
Material	This can be changed by making parachutes with different materials	The type of material should effect the rate of decent and make it fall faster or slower
Height	The height from which the parachute is dropped	The higher the parachute is dropped from the ground the longer it should take to reach the ground. The lower it is dropped the faster it should reach the ground
Condition of environment	This can be changed by dropping the parachute in different conditions. i.e. windy	This should effect the descent of the parachute because there might be more or less wind or no wind at all

Gcse Physics Controlled Assessment Parachute

I. S. Hoffman

Gcse Physics Controlled Assessment Parachute:

Ignite the flame of optimism with Get Inspired by is motivational masterpiece, Fuel Your Spirit with **Gcse Physics Controlled Assessment Parachute** . In a downloadable PDF format (Download in PDF: *), this ebook is a beacon of encouragement. Download now and let the words propel you towards a brighter, more motivated tomorrow.
