The British National Bibliography Arthur James Wells, 1973 **Annual Paperbound Book Guide for High Schools**, 1969 **The Journal of Education**, 1900 *Raw Data Is an Oxymoron* Lisa Gitelman, 2013. We live in the era of Big Data with storage and transmission capacity measured not just in terabytes but in petabytes where peta denotes a quadrillion or a thousand trillion. Data collection is constant and even insidious with every click and every like stored somewhere for something. This book reminds us that data is anything but raw; that we shouldn't think of data as a natural resource but as a cultural one that needs to be generated, protected and interpreted. The book's essays describe eight episodes in the history of data from the predigital to the digital. Together they address such issues as the ways that different kinds of data and different domains of inquiry are mutually defining how data are variously cooked in the processes of their collection and use and conflicts over what can or can't be reduced to data. Contributors discuss the intellectual history of data as a concept, describe early financial modeling and some unusual sources for astronomical data, discover the prehistory of the database in newspaper clippings and index cards and consider contemporary dataveillance of our online habits as well as the complexity of scientific data curation.
