

25. Classical Mechanics: Lagrangian & Hamiltonian

Mathematically, what we're really doing is expressing those ideas in a more abstract, more general way. Instead of saying "the system has a certain energy", we say "the system has a certain energy function". This is a more general way of saying "the system has a certain energy".

Now, what if we want to go further? What if we want to go from the Lagrangian to the Hamiltonian? Well, the Hamiltonian is a more general way of saying "the system has a certain energy". It's a more general way of saying "the system has a certain energy".

Figure 2.1: Icons

- 1. The Lagrangian is a function of the system's position and velocity.
- 2. The Hamiltonian is a function of the system's position and momentum.
- 3. The Hamiltonian is a function of the system's position and energy.
