Manitoba's curricula for the first term of the grade 1 school year. The topics are I Belong from the social studies curriculum with The Senses and Characteristics of Objects and Materials from the science curriculum. These are brought into other disciplines: mathematics, physical education and health, language arts and fine arts, particularly through the lens of the multiple intelligences. MI Differentiated activities based on MI approaches inspire diverse students and accommodate their individual learning styles. MI activity cards are included as well as planners that outline the essential understandings, essential questions and final inquiry projects for the unit. Rubrics based on Bloom's taxonomy show a progression of conceptual thinking from rote basic understanding to synthesized higher order analysis. Teachers can use this model unit as a template for planning subsequent thematic units for the rest of the school year. □□ Sue Burnham, 2001

Ima 2 Workbook is an indispensable companion to the Textbook. It contains exercises, activities and puzzles to help students learn to write the katakana script and some kanji characters, listening comprehension exercises based on the lively dialogues recorded on the Ima 2 Audio CDs, writing exercises that focus on grammar and vocabulary questions and reading exercises based on the cartoon and photo stories in the Textbook, activities that give students experience in using Japanese for a practical purpose, for example writing a letter, a web page or a short script, word puzzles and crosswords to help students remember the vocabulary. Hands-On Science, Level 2 Jennifer Lawson, 1999. This teacher resource offers a detailed introduction to the Hands On Science program which includes its guiding principles, implementation guidelines, an overview of the science skills that grade 2 students use and develop and a classroom assessment plan complete with record keeping templates. This resource has four instructional units: Unit 1 Growth and Changes in Animals, Unit 2 Properties of Solids, Liquids and Gases, Unit 3 Position and Motion, Unit 4 Air and Water in the Environment. Each unit is divided into lessons that focus on specific curricular outcomes. Each lesson has materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals.

Real Life Literacy Kathy Paterson, 2006. The compelling connection between the classroom and what happens in the world is the basis of Real Life Literacy. It shows teachers how to turn kids on to learning and build skills that will help them function more successfully in the real world. It fills in the gaps often missing from traditional language arts classes and offers a range of classroom tools that promote real world reading and writing. Some of the basic literacy topics that are covered include Writing and deciphering messages from notes and memos to invitations and advertisements, Taking the mystery out of labels from understanding labels on medicine bottles to making sense of food and clothing labels, Coping with everyday money management from completing order forms to writing cheques and balancing a bank book, Reading and interpreting specialized text from finding information in nonfiction books to effectively using phone books, entertainment guides and bus schedules. This timely book makes a powerful case for linking genuine purposeful and functional in school activities to the lives of students. It promotes using classroom learning to guide and support students as they strive to make meaning of their world.
