It has been argued that the use of the term "disorder" is inappropriate in the context of the DSM-5, as it implies a medical condition. The authors of the DSM-5 have responded to this criticism by stating that the term "disorder" is used to describe a pattern of behavior that is problematic and causes distress or impairment. They argue that the term is not intended to imply a medical condition, but rather a social construct. The authors also note that the term "disorder" is used in many other contexts, such as in the legal system and in the media, and that it is not inherently problematic. They conclude that the term "disorder" is a necessary part of the DSM-5, and that it should be used in a way that is consistent with the manual's purpose.
