## Log Quality Control Manual:

Log Data Acquisition and Quality Control Philippe P. Theys, 1999 While the first well logs recorded seventy years ago had no provision for data quality control the development of increasingly sophisticated logging techniques has led to the introduction of a large number of tests to validate acquired data Log quality can be assured by stringent control of depth calibrations signal processing and operating procedures This work gives a thorough description of these features The meaningful interpretation of well logs depends on valid input An understanding of log acquisition and the performance of rigorous quality checks are the prerequisites for an accurate evaluation of a formation These elements also enable log users to make decisions based on calculated risks The book is primarily written for earth science specialists who use log data It also addresses the needs of logging engineers who seek a better understanding of the log acquisition process Exercises and their solutions are scattered in the book to complement practical chapters Contents I Premises 1 Introduction 2 Evaluation of hydrocarbon volume 3 Data collection and decision making 4 Elements of metrology I error analysis 5 Elements of metrology II volume considerations 6 Elements of metrology III other attributes 7 Mathematical preliminary propagation of errors II Data acquisition 8 Data acquisition 9 Sensor and source technology 10 Effect of measurement duration on precision 11 Signal processing filtering 12 Enhancement of vertical resolution through processing 13 Tool response 14 Environmental corrections 15 The real environment 16 Density logging 17 Calibration 18 Monitoring of tool behavior 19 Measurement of depth 20 Directional surveys III Data quality control 21 Data quality plan 22 Completeness of information 23 Data management 24 Log quality checks 25 Data quality evaluation 26 Images and nuclear magnetic resonance 27 Comparison of logged data with other information 28 Optimum logging and uncertainty management Bibliography Index *Log Data Acquisition and...* Philippe P.
