The Chinese Macroeconomy and Financial System Ronald M Schramm, 2015-04-24 This new textbook on the Chinese economy clearly presents all that the world's second largest economy has accomplished as well as what work remains to be done. As economic development in China for the last 30 years has been mostly top down, this text focuses on the macroeconomic and monetary sides of the economy. Utilising case studies throughout the book, it uses not only the traditional macroeconomics tools in explaining the Chinese economy but also takes a novel approach by assessing China as a company. Through employment of models from finance such as cash flows and valuations, the text is able to dig deeper into understanding the fundamental characteristics of the Chinese economy. The book also presents extremely useful analysis of the comparisons and contrasts between Chinese economic activity and that of the U.S. economy. eResources including chapter questions with solutions and lecture slides will be available on this webpage. **TARGET IIFT 2021 (Past Papers 2005 - 2020) + 5 Mock Tests 12th Edition** Disha Experts, 2020-07-01 **ECONOMICS ASSIGNMENT CLASS 12TH**, This book comprises short notes on each chapter of class 12th economics micro as well as macro. China's New Normal is the result of the growing pressures on domestic resources, environmental restrictions, and unstable international economic recovery, and is characterized by a moderate economic increase, a proper increase in commodity pricing, stabilizing new employment, and optimizing economic structure. The book argues that while China focuses on stability and quality in macro control and enhancing reform and innovation, many contradictions and problems in economic operations are gradually being solved, therefore optimizing the economic structure. The book explores many aspects of China's economic development under the New Normal while making analysis and policy suggestions for the present economic trends.
