Marcos Roberto de Oliveira,2022-11-30 Mitochondrial Intoxication explores the effects toxic molecules can have upon mitochondrial physiology in the human body Each chapter is dedicated to a specific toxicant including pollutants food additives illicit and pharmaceutical drugs and heavy metals This book considers the implications and impact these have upon mitochondria and the diseases that can result from dysfunction and impairment in the human body Furthermore the book provides an overview of mitochondrial physiology and assesses the advances and challenges in testing mitochondrial toxicity Case studies exploring mitochondrial intoxication in pregnancy and in the geriatric population are also included This is a comprehensive reference on the main toxicants impacting mitochondria in the human body and the consequences this can have for health and disease Features a wide range of toxicants and their effects on mitochondrial physiology Covers molecular markers of mitochondrial intoxication Includes case studies that illustrate the health impacts of toxicity upon mitochondria Considers future directions regarding the study of mitochondrial intoxication Handbook on the Toxicology of Metals: Volume II: Specific Metals Gunnar F. Nordberg,Max Costa,2021-12-01 Handbook on the Toxicology of Metals Volume II Specific Metals Fifth Edition provides complete coverage of 38 individual metals and their compounds This volume is the second volume of a two volume work which emphasizes toxic effects in humans along with discussions on the toxic effects of animals and biological systems in vitro when relevant The book has been systematically updated with the latest studies and advances in technology As a multidisciplinary resource that integrates both human and environmental toxicology the book is a comprehensive and valuable reference for toxicologists physicians pharmacologists and environmental scientists in the fields of environmental occupational and public health Contains peer reviewed chapters that deal with the effects of metallic elements and their compounds on biological systems with a focus on human health effects Includes information on sources transport and the transformation of metals in the environment Provides critical information on the properties use biological monitoring dose response relationships diagnosis treatment and prevention of 38 metallic elements and their compounds **Animal Models of Neurological Disorders** Puneet Kumar Bansal,Rahul Deshmukh,2018-01-17

This book introduces undergraduate postgraduate and research students and scientists to animal models of neurological disorders along with their working principle and brief procedures Addressing all the disorders related to the central nervous system CNS in a single platform on the basis of various literature surveys it describes different procedures to induce a single disease with the help of toxins chemicals It also includes numerous protocols for inducing single neurological diseases thus fulfilling an urgent need for a book that makes specific procedures for neurological disorders available so that specific disease can be induced in laboratories according to the availability of resources Further it acquaints readers with the

pathological changes that occur in a particular neurological disorder which reflect specific signs and symptoms of any particular disease and examines how they affect everyday life It is a valuable resource for researchers aiming to eradicate or improve neurological disorders by testing the benefits of different drugs

Religious Education in Malawi and Ghana Yonah Matemba, Richardson Addai-Mununkum, 2021-03-15 Religious Education in Malawi and Ghana contributes to the literature on opportunities and complexities of inclusive approaches to Religious Education RE It analyses how RE in Malawi and Ghana engages with religious pluralisation and provides a compelling case for the need to re evaluate current approaches in the conceptualisation curriculum design and delivery of RE in schools in Malawi and Ghana The book explains how a pervasive tradition of selection involving exclusion and inclusion of religion in RE leads to misrepresentation and in turn to misclusion of non normative religions where religion is included but marginalized and misrepresented The book contributes to wider discourse of RE on opportunities as well as complexities of post confessional approaches including the need for RE to avoid perpetuating the continued legitimisation of selected religions and in the process the delegitimization of the religious other as a consequence of misrepresentation and misclusion Inspired by Braten s methodology for comparative studies in RE the book draws on two qualitative studies from Malawi and Ghana to highlight the pervasive problems of religious misclusion in RE This book will be of great interest for academics scholars and post graduate students in the fields of RE African education educational policy international education and comparative education
