Fluid Mechanics Joseph H. Spurk, 1997-07-07 This collection of over 200 detailed worked exercises adds to and complements the textbook *Fluid Mechanics* by the same author and at the same time illustrates the teaching material via examples The exercises revolve around applying the fundamental concepts of Fluid Mechanics to obtain solutions to diverse concrete problems and in so doing the students skill in the mathematical modelling of practical problems is developed In addition 30 challenging questions WITHOUT detailed solutions have been included While lecturers will find these questions suitable for examinations and tests students themselves can use them to check their understanding of the subject

Chemical Engineering: Solutions to the Problems in Volume 1 J R Backhurst, J H Harker, J.F. Richardson, 2013-10-22 This volume in the Coulson and Richardson series in chemical engineering contains full worked solutions to the problems posed in volume 1 Whilst the main volume contains illustrative worked examples throughout the text this book contains answers to the more challenging questions posed at the end of each chapter of the main text These questions are of both a standard and non standard nature and so will prove to be of interest to both academic staff teaching courses in this area and to the keen student Chemical engineers in industry who are looking for a standard solution to a real life problem will also find the book of considerable interest An invaluable source of information for the student studying the material contained in Chemical
