Natural Compounds as Antimicrobial Agents Carlos M. Franco, Beatriz Vázquez Belda, 2020-12-02 The world is full of plants and animals that have their own defenses producing various substances in their daily fight against bacteria fungi or other agents These products are alternatives to conventional antimicrobials that have a poor reputation with consumers Many of these compounds are well known however the multiple types of structures together with the variable responses depending of the type of biocontrol needed in a wide range of applications such as clinical agricultural general hygiene and food necessitates the continuous search for specific applications and the continuous study of how to use these substances The present book provides a summary of reviews and original research works that explore the multiple alternatives for the use of these compounds

Macamo, Jean-Bernard Ouédraogo, 2019-01-17 How realistic is it to expect translation to render the world intelligible in a context shaped by different historical trajectories and experiences Can we rely on human universals to translate through the unique and specific webs of meaning that languages represent If knowledge production is a kind of translation then it is fair to assume that the possibility of translation has largely rested on the idea that Western experience is the repository of these human universals against the background of which different human experiences can be rendered intelligible The problem with this assumption however is that there are limits to Western claims to universalism mainly because these claims were at the service of the desire to justify imperial expansion This book addresses issues arising from these claims to universalism in the process of producing knowledge about diverse African social realities It shows that the idea of knowledge production as translation can be usefully deployed to inquire into how knowledge of Africa translates into an imperial attempt at changing local norms institutions and spiritual values Translation in this sense is the normalization of meanings issuing from a local historical experience claiming to be universal The task of producing knowledge of African social realities cannot be adequately addressed without a prior critical engagement with how translation has come to shape our ways of rendering Africa intelligible , **Functional Foods of the Future** Vijai Kumar Gupta, Minaxi Sharma, Smriti
