

HP Prime Programming Tutorial #1: LOCAL, RETURN

Over the next month, maybe month and a half, I plan to post programming tutorials for the HP (Hewlett Packard) Prime.

If you have programmed with the HP 38G, 39g, or 39gii, this language will be similar to those. The programming language for the Prime is named the HP Prime Programming Language (HPPP).

Throughout this tutorial, I am going to use the latest version of the software.

How to start writing a program:

1. Press Shift + 1 (Program).
2. Press New. It is the second touch key.
3. Enter the name of the program. Pressing the ALPHA key twice will turn on UPPERCASE ALPHA-LOCK. Pressing ALPHA, Shift, ALPHA will turn on lowercase alpha-lock. To exit any lock, press the ALPHA key one more time. When happy with the name, press Enter.

Programs. The Debug touch key allows for debugging programs.

New Program screen. Use the ALPHA key to type text.
