### Paper 1 Example (3 SAQs & 1 ERQ)

Answer all questions in this section. Marks will be awarded for focused answers supported by relevant knowledge and study.

1. Describe neuroplasticity, with reference to one study. [9 marks]

Neuroplasticity is the brain's ability to change in response to environmental demands. This occurs through neuronal unmasking and neural pruning. Neuronal unmasking is when the brain activates dormant neurons and strengthens them through practice, which increases neuronal density in the areas of the brain with recent patterns of activity. Long-term potentiation is the term used for the strengthening of neural networks through recent patterns of activity in specific regions of the brain that cause a long-lasting increase in signal transmission in those regions and this explains how the brain structure changes as a result of environmental demands. However, a lack of activity in neural networks leads to the weakening and the elimination of these networks which is known as neural pruning. Many studies have investigated neuroplasticity in action, namely Maguire et al. (2000) which investigated whether structural changes were evident in the brains of people with extensive experience in spatial navigation.

The study compared MRI scans of 16 right-handed male taxi drivers in London that have all been driving for at least 1.5 years to the MRI scans of 50 right-handed males from the London Hospital who were not taxi drivers. The mean age did not differ between the experimental group and the control group. They found that the taxi drivers had increased grey matter in the hippocampal areas as compared to the control group which suggests that the hippocampus plays a role in spatial navigation. Furthermore, they found that the taxi drivers had larger posterior hippocampi than the control group, whilst the control group had larger anterior hippocampus than the taxi drivers. This demonstrates long-term potentiation occurring in the taxi drivers' posterior hippocampi. Since, the taxi drivers use their spatial navigation skills frequently, the recent activity in the posterior hippocampus leads to the strengthening of the neural networks in that region which increases the neural density and is evident through the larger volume of the posterior hippocampus in the taxi drivers. Moreover, a positive correlation between the number of years driving and the volume of the posterior hippocampus was discovered, which creates a direct link between increased use of spatial navigation skills and the volume of that region. This further demonstrates the effects of long-term potentiation on brain structure and, therefore, the relationship between brain structure and environmental demands. They concluded that the structural changes were evident in the brains of the taxi drivers, with extensive experience in spatial navigation and the findings of this study act as evidence for neuroplasticity as the changes in the volume of the posterior hippocampus (a change in the structure of the brain) is shown to be impacted by the experience in spatial navigation (the environmental demand).

Excellent links made.

You described two specific parts of neuroplasticity, but not what it is in general.

## **Ib Psychology Past Papers 2013:**

**Psychology and Law** Curt R. Bartol, Anne M. Bartol, 2018-11-27 I like the use of research and citations throughout the text. It is more comprehensive than my current text and does a much better job of presenting the scientific evidence. Kathy McGuire, Western Illinois University. Written by authors with extensive experience in the field and in the classroom. **Psychology and Law: Research and Practice, Second Edition** offers the definitive perspective on the practical application of psychological research to the law. Curt R. Bartol and Anne M. Bartol emphasize the various roles psychologists and other mental health professionals play in criminal and civil legal matters. Topics such as family law, mental health evaluations, police interrogation, jury selection, and decision making, involuntary civil commitment, and various civil capacities are included. The authors also emphasize the major contributions psychological research has made to the law and encourage critical analysis through examples of court cases, high profile current events, and research. This comprehensive book examines complex material in detail and explains it in an easy-to-read way. New to the Second Edition: The new edition has been significantly reorganized to more closely align with the progression through the court system. A new chapter on children, adolescents, and criminal law. Chapter 8 provides students with information on adjudicative competence, comprehension of constitutional rights, and eyewitness identification and courtroom testimony. New feature boxes include case studies, research projects, and contemporary topics with discussion questions for classroom debate. Additional court cases and statutes have been integrated into chapters to emphasize the important role psychology plays in the legal process. The content is applied to real cases such as the Masterpiece Cakeshop case and the Dassey confession, comprehending Miranda. Over 300 recent research findings on topics related to psychology and law highlight cutting-edge research studies that help students understand what research does and prompt them to discuss the methodology and results. New pedagogical tables clearly illustrate complex information around ethical issues, APA amicus briefs, strengths and weaknesses of simulation studies, insanity standards, within-the-states effects experienced by survivors of traumatic incidents, and more. Increased coverage of contemporary issues encourages critical thinking and active learning by promoting discussions around current issues such as telepsychology, neuropsychology, adversarial allegiance, and actuarial instruments used in bail and sentence decision making.

**Ebook: The Science of Psychology: An Appreciative View** King, 2016-09-16 **Ebook: The Science of Psychology: An Appreciative View** **Teaching Change** José Antonio Bowen, 2021-09-28 This pathbreaking book for educators shows that focusing on relationships, resilience, and reflection can better prepare graduates for the future. Learning something new, particularly something that might change your mind, is much more difficult than most teachers think. Because people think with their emotions and are influenced by their communities and social groups, humans tend to ignore new information unless it fits their existing worldview. Thus, facts alone, even if discussed in detail, typically fail to open minds and create change. In a world in need of graduates who can adapt to new information and situations, we need to renew our educational commitment to producing

flexible and independent thinkers In *Teaching Change* Jos Antonio Bowen argues that education needs to be redesigned to take into account how human thinking behaviors bias and change really work Drawing on new research Bowen explores how we can create better conditions for learning that focus less on teachers and content and more on students and process He also examines student psychology history assumptions anxiety and bias and advocates for education to focus on a new 3Rs relationships resilience and reflection Finally he suggests explicit learning designs to foster the ability to think for yourself The case for a liberal by which Bowen means liberating education has never been stronger but he says it needs to be redesigned to achieve the goal of creating lifelong learners and citizens capable of divergent and independent thinking With an expansive and powerful argument *Teaching Change* combines elegant and gripping explanations of recent and wide ranging research from biology economics education and neuroscience with hundreds of practical suggestions for individual teachers

**A History of Psychology** William Douglas Woody, Wayne Viney, 2017-03-27 *A History of Psychology The Emergence of Science and Applications Sixth Edition* traces the history of psychology from antiquity through the early 21st century giving students a thorough look into psychology's origins and key developments in basic and applied psychology This new edition includes extensive coverage of the proliferation of applied fields since the mid twentieth century and stronger emphases on the biological basis of psychology new statistical techniques and qualitative methodologies and emerging therapies Other areas of emphasis include the globalization of psychology the growth of interest in health psychology the resurgence of interest in motivation and the importance of ecopsychology and environmental psychology Substantially revised and updated throughout this book retains and improves its strengths from prior editions including its strong scholarly foundation and scholarship from groups too often omitted from psychological history including women people of color and scholars from outside the United States This book also aims to engage and inspire students to recognize the power of history in their own lives and studies to connect history to the present and the future and to think critically and historically For additional resources consult the Companion Website at [www.routledge.com/cw/woody](http://www.routledge.com/cw/woody) where instructors will find lecture slides and outlines testbanks and how to sources for teaching History and Systems of Psychology courses and students will find review a timeline review questions complete glossary and annotated links to relevant resources

*Secret Diplomacy* Corneliu Bjola, Stuart Murray, 2016-04-14 This volume investigates secret diplomacy with the aim of understanding its role in shaping foreign policy Recent events including covert intelligence gathering operations accusations of spying and the leaking of sensitive government documents have demonstrated that secrecy endures as a crucial yet overlooked aspect of international diplomacy The book brings together different research programmes and views on secret diplomacy and integrates them into a coherent analytical framework thereby filling an important gap in the literature The aim is to stimulate generate and direct the further development of theoretical understandings of secret diplomacy by highlighting gaps in existing bodies of knowledge To this end the volume is structured around three distinct themes concepts contexts and cases

The first section elaborates on the different meanings and manifestations of the concept the second part examines basic contexts that underpin the practice of secret diplomacy while the third section presents a series of empirical cases of particular relevance for contemporary diplomatic practice While the fundamental conditions diplomacy seeks to overcome alienation estrangement and separation are imbued with distrust and secrecy this volume highlights that if anything secret diplomacy is a vital if misunderstood and unfairly criticised aspect of diplomacy This book will be of much interest to students of diplomacy intelligence studies foreign policy and IR in general

*Bihar and Mithila* J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For

politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates
