IBM Information Governance Solutions Chuck Ballard,John Baldwin,Alex Baryudin,Gary Brunell,Christopher Giardina,Marc Haber,Erik A O'Neill,Sandeep Shah,IBM Redbooks,2014-04-04 Managing information within the enterprise has always been a vital and important task to support the day to day business operations and to enable analysis of that data for decision making to better manage and grow the business for improved profitability To do all that clearly the data must be accurate and organized so it is accessible and understandable to all who need it That task has grown in importance as the volume of enterprise data has been growing significantly analyst estimates of 40 50% growth per year are not uncommon over the years However most of that data has been what we call structured data which is the type that can fit neatly into rows and

columns and be more easily analyzed Now we are in the era of big data This significantly increases the volume of data available but it is in a form called unstructured data That is data from sources that are not as easily organized such as data from emails spreadsheets sensors video audio and social media sites There is valuable information in all that data but it calls for new processes to enable it to be analyzed All this has brought with it a renewed and critical need to manage and organize that data with clarity of meaning understandability and interoperability That is you must be able to integrate this data when it is from within an enterprise but also importantly when it is from many different external sources What is described here has been and is being done to varying extents It is called information governance Governing this information however has proven to be challenging But without governance much of the data can be less useful and perhaps even used incorrectly significantly impacting enterprise decision making So we must also respect the needs for information security consistency and validity or else suffer the potential economic and legal consequences Implementing sound governance practices needs to be an integral part of the information control in our organizations This IBM Redbooks publication focuses on the building blocks of a solid governance program It examines some familiar governance initiative scenarios identifying how they underpin key governance initiatives such as Master Data Management Quality Management Security and Privacy and Information Lifecycle Management IBM Information Management and Governance solutions provide a comprehensive suite to help organizations better understand and build their governance solutions The book also identifies new and innovative approaches that are developed by IBM practice leaders that can help as you implement the foundation capabilities in your organizations

Leveraging DB2 10 for High Performance of Your Data Warehouse Whei-Jen Chen,Scott Andrus,Bhuvana Balaji,Enzo Cialini,Michael Kwok,Roman B. Melnyk,Jessica Rockwood,IBM Redbooks,2014-01-08 Building on the business intelligence BI framework and capabilities that are outlined in InfoSphere Warehouse A Robust Infrastructure for Business Intelligence SG24 7813 this IBM Redbooks publication focuses on the new business insight challenges that have arisen in the last few years and the new technologies in IBM DB2 10 for Linux UNIX and Windows that provide powerful analytic capabilities to meet those challenges This book is organized in to two parts The

first part provides an overview of data warehouse infrastructure and DB2 Warehouse and outlines the planning and design process for building your data warehouse The second part covers the major technologies that are available in DB2 10 for Linux UNIX and Windows We focus on functions that help you get the most value and performance from your data warehouse These technologies include database partitioning intrapartition parallelism compression multidimensional clustering range table partitioning data movement utilities database monitoring interfaces infrastructures for high availability DB2 workload management data mining and relational OLAP capabilities A chapter on BLU Acceleration gives you all of the details about this exciting DB2 10 5 innovation that simplifies and speeds up reporting and analytics Easy to set up and self optimizing BLU Acceleration eliminates the need for indexes aggregates or time consuming database tuning to achieve top performance and storage efficiency No SQL or schema changes are required to take advantage of this breakthrough technology This book is primarily intended for use by IBM employees IBM clients and IBM Business Partners

ISOPAR, a New and Improved Sympolic Optimizing Assembly Routine for the IBM 650 H. Herbert Howe,1960

Business Optimization Using Mathematical Programming Josef Kallrath,2021-08-31 This book presents a structured approach to formulate model and solve mathematical optimization problems for a wide range of real world situations Among the problems covered are production distribution and supply chain planning scheduling vehicle routing as well as cutting stock packing and nesting The optimization techniques used to solve the problems are primarily linear mixed integer linear nonlinear and mixed integer nonlinear programming The book also covers important considerations for solving real world optimization problems such as dealing with valid inequalities and symmetry during the modeling phase but also data interfacing and visualization of results in a more and more digitized world The broad range of ideas and approaches presented helps the reader to learn how to model a variety of problems from process industry paper and metals industry the energy sector and logistics using mathematical optimization techniques

[Handbook of Optimization in Electric Power Distribution Systems](#) Mariana Resener,Steffen Rebennack,Panos M. Pardalos,Sérgio Haffner,2020-02-24 This handbook gathers state of the art research on optimization problems in power distribution systems covering classical problems as well as the challenges introduced by distributed power generation and smart grid resources It also presents recent models solution techniques and computational tools to solve planning problems for power distribution systems and explains how to apply them in distributed and variable energy generation resources As such the book therefore is a valuable tool to leverage the expansion and operation planning of electricity distribution networks

[Optimizing DB2 Queries with IBM DB2 Analytics Accelerator for z/OS](#) Paolo Bruni,Patric Becker,Willie Favero,Ravikumar Kalyanasundaram,Andrew Keenan,Steffen Knoll,Nin Lei,Cristian Molaro,P S Prem,IBM Redbooks,2012-12-20 The IBM DB2 Analytics Accelerator Version 2 1 for IBM z OS also called DB2 Analytics Accelerator or Query Accelerator in this book and in DB2 for z OS documentation is a marriage of the IBM System z Quality of Service and Netezza technology to accelerate complex queries in a DB2 for z OS highly secure and available environment

Superior performance and scalability with rapid appliance deployment provide an ideal solution for complex analysis This IBM Redbooks publication provides technical decision makers with a broad understanding of the IBM DB2 Analytics Accelerator architecture and its exploitation by documenting the steps for the installation of this solution in an existing DB2 10 for z OS environment In this book we define a business analytics scenario evaluate the potential benefits of the DB2 Analytics Accelerator appliance describe the installation and integration steps with the DB2 environment evaluate performance and show the advantages to existing business intelligence processes

Modeling, Simulation and Optimization of Complex Processes HPSC 2018 Hans Georg Bock, Willi Jäger, Ekaterina Kostina, Hoang Xuan

Phu, 2020-12-01 This proceedings volume highlights a selection of papers presented at the 7th International Conference on High Performance Scientific Computing which took place in Hanoi Vietnam during March 19 23 2018 The conference has been organized by the Institute of Mathematics of the Vietnam Academy of Science and Technology the Interdisciplinary Center for Scientific Computing IWR of Heidelberg University and the Vietnam Institute for Advanced Study in Mathematics The contributions cover a broad interdisciplinary spectrum of scientific computing and showcase recent advances in theory methods and practical applications Subjects covered include numerical simulation methods for optimization and control machine learning parallel computing and software development as well as the applications of scientific computing in mechanical engineering aerospace engineering environmental physics decision making hydrogeology material science and electric circuits

Optimization and Decision Support Design Guide: Using IBM ILOG Optimization Decision Manager Axel Buecker, Yana Ageeva, Veronique Blanchard, Dr. Jeremy Bloom, Dr. Mehmet F. Candas, Joao Chaves, Guang

Feng, Abhishek Raman, Dr. Hans Schlenker, IBM Redbooks, 2012-10-10 Today many organizations face challenges when developing a realistic plan or schedule that provides the best possible balance between customer service and revenue goals Optimization technology has long been used to find the best solutions to complex planning and scheduling problems A decision support environment that enables the flexible exploration of all the trade offs and sensitivities needs to provide the following capabilities Flexibility to develop and compare realistic planning and scheduling scenarios Quality sensitivity analysis and explanations Collaborative planning and scenario sharing Decision recommendations This IBM Redbooks publication introduces you to the IBM ILOG Optimization Decision Manager ODM Enterprise This decision support application provides the capabilities you need to take full advantage of optimization technology Applications built with IBM ILOG ODM Enterprise can help users create compare and understand planning or scheduling scenarios They can also adjust any of the model inputs or goals and fully understanding the binding constraints trade offs sensitivities and business options This book enables business analysts architects and administrators to design and use their own operational decision management solution
