Law and Corporate Behaviour Christopher Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance Systems in which reporting is essential for safety only function with a no blame culture The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new

theory of ethical regulation This title is included in Bloomsbury Professional's International Arbitration online service

Industrial Aviation Management Martin Hinsch, 2018-09-07 This book outlines the structure and activities of companies in the European aviation industry The focus is on the design production and maintenance of components assemblies engines and the aircraft itself In contrast to other industries the technical aviation industry is subject to many specifics since its activities are highly regulated by the European Aviation Safety Agency EASA the National Aviation Authorities and by the aviation industry standard EN 9100 These regulations can influence the companies organization personnel qualification quality management systems as well as the provision of products and services This book gives the reader a deeper up to date insight into today's quality and safety requirements for the modern aviation industry Aviation specific interfaces and procedures are looked at from both the aviation legislation standpoint as well as from a practical operational perspective

Safety and Quality in Medical Transport Systems John W. Overton, 2019-07-23 The Commission on Accreditation of Medical Transport Systems CAMTS has been accrediting air and ground transport services since 1991 One of the most significant needs the Commission has recognized is to assist transport services in creating a culture that supports safety and quality for both crews and patients Most of the helicopter EMS emergency medical service accidents and many ground ambulance accidents can be attributed to human factors and systems designs that lead to poor decision making Management commitment is vital to create and maintain a culture that supports risk assessment accountability professionalism and organizational dynamics This reference book has been created by CAMTS to address this need directly and comprehensively It offers a groundbreaking collection of expert insights and practical solutions that can be used by EMS Fire and Rescue public and private services and professional emergency and transport professionals worldwide Quoting from the foreword written by the late Robert L Helmreich Professor Emeritus of Psychology at The University of Texas Human Factors Research Project This is an important book which should be required reading for everyone involved in patient transport from managers and dispatchers to those at the sharp end The experienced and able authors and editors of this work use culture as the overarching concept needed to maximize safety while delivering patients expeditiously

Air Transport Management Lucy Budd, Stephen Ison, 2016-11-10 Commercial air transport is a global multimillion dollar industry that underpins the world economy and facilitates the movement of over 3 billion passengers and 50 million tonnes of air freight worldwide each year With a clearly structured topic based approach this textbook presents readers with the key issues in air transport management including aviation law and regulation economics finance airport and airline management environmental considerations human resource management and marketing The book comprises carefully selected contributions from leading aviation scholars and industry professionals worldwide To help students in their studies the book includes case studies examples learning objectives keyword definitions and stop and think boxes to prompt reflection and to aid understanding Air Transport Management provides in depth instruction for undergraduate and postgraduate students

studying aviation and business management related degrees It also offers support to industry practitioners seeking to expand their knowledge base *Field Manuals* United States. War Department,1978-05 Documents Council of Europe: Parliamentary Assembly,2007-03-19 *Convention on International Civil Aviation* Ruwantissa Abeyratne,2013-08-04 This book is both a repertory guide to the Convention on International Civil Aviation Chicago Convention as well as a legal analysis of the provisions of the treaty It traces action taken by the ICAO Assembly and the Council in the implementation of the Convention from the first ICAO Assembly in 1947 until 2012 Above all the book offers a commentary on the functional and moral fabric of the Chicago Convention which is not only a multilateral legal instrument that sets out basic principles of air navigation and air transport but also serves as a moral compass that brings the people of the world together The teleological nature of the Chicago Convention is reflected from the outset from its Preamble which sets the tone and philosophy of the Convention that aviation builds friendship and understanding among all people to its technical provisions that range from rules of the air to landing at airports and customs and immigration procedures The book effectively demonstrates the Aristotelian principle that rules make people good by forming habits in them Standardization or in other words compliance is the driver of the Convention that keeps aviation safe regular efficient and economical To that end this book traces and details the sustained relevance of the Chicago Convention and the efforts of ICAO and the international aviation community towards keeping air transport on track and ready for its future exponential growth both in letter and in spirit
