

Module 2: Phylogeny

1. In module 1, you identified which species of lizards were most similar to one another based on relative limb length and toe pad size. In this module, you determined which lizards are more similar to one another based on what type of information?

2. Are the species of lizard that are more similar to one another according to body type also more closely related based on the results obtained in this module? Explain your answer.

3. The figures below show two phylogenetic trees similar to the one you constructed in the virtual lab but with more lizards. The trees below show the evolutionary relationships among species from four ecomorphs from the four largest Caribbean islands.

Figure 1. Phylogeny of anole lizards on four of the major Caribbean islands color-coded according to geographical distribution. Light dotted line, Puerto Rico; small dashed line, Cuba; large dashed line, Hispaniola; and solid line, Jamaica.

facts With numerous photos and illustrations this tome is richly illustrated and its helpful bibliography and extensive index add to its usefulness It s a perfect reference to help make sense of 65 million year old mysteries **Lizard Ecology** Stephen M. Reilly,Lance D. McBrayer,Donald B. Miles,2007-07-12 Originally published in 2006 this book was the first critical review of the effects of lizard foraging modes in 30 years The Origin of Snakes Michael Wayne Caldwell,2019-06-28 This book presents perspectives on the past and present state of the understanding of snake origins It reviews and critiques data and ideas from paleontology and neontology herpetology as well as ideas from morphological and molecular phylogenetics The author reviews the anatomy and morphology of extant snakes Methods are also critiqued including those empirical and theoretical methods employed to hypothesize ancestral ecologies for snakes The modern debate on squamate phylogeny and snake ingroup phylogeny using molecules and morphology is examined critically to provide insights on origins and evolution Key Features Important major evolutionary transformation in vertebrate evolution Continuing historical debate in vertebrate paleontology Of wide interest to a core audience of paleontologists herpetologists and morphologists Author acknowledged as prominent contributor to debate over snake origins Based on remarkable well preserved fossil specimens *Answer to Jung* Lynn Brunet,2018-11-08 The Red Book is C G Jung s record of a period of deep penetration into his unconscious mind in a process that he called active imagination undertaken during his mid life period Answer to Jung Making Sense of The Red Book provides a close reading of this magnificent yet perplexing text and its fascinating images and demonstrates that the fantasies in The Red Book are not entirely original but that their plots characters and symbolism are remarkably similar to some of the higher degree rituals of Continental Freemasonry It argues that the fantasies may be memories of a series of terrifying initiatory ordeals possibly undergone in childhood using altered or spurious versions of these Masonic rites It then compares these initiatory scenarios with accounts of ritual trauma that have been reported since the 1980s This is the first full length study of The Red Book to focus on the fantasies themselves and provide such an external explanation for them Sonu Shamdasani describes The Red Book as an incomplete task that Jung left to posterity as a message in a bottle that would someday come ashore Answer to Jung brings its message to shore providing a coherent but disturbing interpretation of each of the fantasies and their accompanying images Chapters Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **How to answer to an atheist** Roope Berg,2025-06-12 In today s debate about religion and Christianity atheism seems to be dominant And anyway at least in Western countries atheism seems to be the dominant ideology One reason for this seems to be that Christians that is Jesus disciples do not know their own matter well Atheists have many websites to help them in the discussion where attacks against Christianity are collected but the greatest help for them is the ignorance of Christians in many matters Of course Christians also have their own websites where there are ready made answers But in many cases those answers seem to be a bit incomplete which gives the opponent an advantage The

saddest part of ignorance is that many wrong and false perceptions are unleashed when people don't know how to correct them. It can easily lead many to abandon Christianity and also prevents many from choosing Christianity. Everyone should be free to choose whether to believe the message but it would be good if the choice were based on correct information and not just one often distorted view on the matter. This book examines many of the questions and answers related to Christianity that have come up in discussions. The book is not intended to make you a believer and you don't even have to agree with the ideas. The goal is to provide an alternative to what otherwise seems to be quite one-sided thinking and hopefully help you understand things related to Christianity better.

Lizards in an Evolutionary Tree Jonathan Losos, 2009-08-15. Adaptive radiation which results when a single ancestral species gives rise to many descendants each adapted to a different part of the environment is possibly the single most important source of biological diversity in the living world. One of the best studied examples involves Caribbean Anolis lizards. With about 400 species, Anolis has played an important role in the development of ecological theory and has become a model system exemplifying the integration of ecological, evolutionary, and behavioral studies to understand evolutionary diversification. This major work written by one of the best known investigators of Anolis reviews and synthesizes an immense literature. Jonathan B. Losos illustrates how different scientific approaches to the questions of adaptation and diversification can be integrated and examines evolutionary and ecological questions of interest to a broad range of biologists.
