Taylor, Paul F. Williams, 2020-12-29 The perspective of this book is to present ethics as a conversation about how we decide what is good or bad right or wrong It is a collection of conversations employed by educators to assist accounting students in developing their understanding of accounting s ethical aspects and to help them develop into critical thinkers who consider the ethical complexities of the function of accounting in human society Because we are social beings ethics is a

central human concern since it involves determining the ethicality of human actions and their effect on other individuals as well as determining the collective societal acceptance or rejection of an action. Thus the book's primary goal is to call attention to the intersectionality of accounting and ethics and to encourage students and researchers to consider the ethical implications of accounting decisions. The book contains a diversity of perspectives within which discussions of accountants and accounting's ethical responsibilities may occur. The contributing authors were deliberately chosen for their diverse perspectives on whence moral guidance for accounting may come. Each chapter stands on its own and represents the thinking of its authors. The book is not a primer on correct behavior for accountants but a place where educators may spur the conversation along.

Corporate Finance Pasquale De Luca, 2022-12-15 This book on corporate finance systemically integrates firms' approach toward the market, the value fundamentals of investors and the pricing dynamics of financial markets. The reader is first introduced to an illustration and analysis of some of the main models used in corporate finance and in asset pricing. The text moves to define the core analysis and valuation techniques to demonstrate how integrating the fields of corporate finance and asset pricing allows us to make comprehensive and precise valuations over time. The textbook combines rigorous quantitative analysis with effective use of graphics to aid intuitive understanding as well as didactic elements to help grasp the theoretical framework. Suitable for advanced undergraduate and graduate students as well as financial analysts and advisors, investors and bankers, the book also provides an overview of Mergers and Acquisitions, M&A, IPO and Private Equity to help illustrate the theoretical concepts in practice.

Advances in Management Accounting Marc J. Epstein, John Y. Lee, 2008-12-24 Features articles on a variety of topics in management accounting that are relevant to researchers in both practice and academe. This work is suitable for management accounting scholars.

Asymmetric Cost Behavior Kristina Reimer, 2018-07-09 The thesis of Kristina Reimer provides a comprehensive analysis of asymmetric cost behavior, also known as cost stickiness, by discussing its origin and development in the theoretical and empirical research from the 1920s of the past century up until today. Further, using an empirical approach, she investigates the implications of asymmetric cost behavior for credit and financial risk of a firm. In addition, she provides an introduction into credit risk fundamentals by focusing on credit default swaps. Thereby, she analyses the development of credit default swap market as well as the components of credit spreads. Finally, she provides several suggestions for future research.

Designing Cost Management Systems to Support Business Decision-Making Pieter Buys, 2021-07-19 This book illustrates the importance of effective cost management systems in providing a supportive environment in which reliable and relevant management information can be generated. Such a cost management system is only attainable if the importance of key business operational and stakeholder requirements are recognised within the organisational context. In illustrating this importance, this book provides several case studies as examples thereof. The first two case studies focus on the engineering sector and illustrate the development of a cost management system in a water recycling context and the design of a

budgetary system in a mining engineering context The remaining case studies focus on the services sector including cost management systems for a digital technology services provider and a medical insurance services provider an alternative activity based costing approach for a public sector services provider and finally a re designed value stream for an automotive services provider Academic researchers and industry managers in the fields of management accounting and financial management as well as engineering and operations management will find value in the experiences described herein
