**Professors** Steven Payson, 2017-10-24 The number of economics professors now teaching at universities will decline substantially over the next couple of decades This will happen for one main reason the advent of distance learning especially in the form of Massive Open Online Courses MOOCs which enable a single professor to lecture to tens of thousands of students Other academic fields will undoubtedly encounter similar reductions in their numbers of professors However as this book argues at several levels academic economics is the one profession that is most qualified to study and address the topic In this sense it is the one profession that should best recognize the economic benefits of this transition which this book describes and take responsibility for leading the transition among all academic fields Unfortunately the position espoused by several academic economists has been against this inevitable transition a position that politically upholds their employment and the status of their institutions They have asserted that MOOCs lower the quality of education and threaten the financial viability of traditional universities Based on extensive evidence and analysis however this book argues that their position untenable Their position is hypocritical as well given the fact that economics professors more than anyone else have upheld the idea that jobs should be lost and new ones should be gained in response to technological changes that promote economic efficiency There is also irony in the fact that the high tuitions required to maintain traditional classrooms effectively deny a college education to those who cannot afford it Thus unsound arguments that traditional lectures are needed to preserve the quality of education actually do not improve the quality of education but have the only real effect of denying education to many people who would otherwise be able to receive it To address this topic comprehensively the book goes deep into fundamental questions about what economics professors really do with their time and energy and what they should be doing in the best interests of their students and of society These are areas that the profession has needed to address for a long time but has failed to do so **Handbook of Sports Economics Research** John Fizez, 2017-07-05 The wealth of data available on sports makes the industry a singular laboratory for observing economic and business behavior and theory This unique reference on sports economics research provides a detailed perspective on the current state of the discipline Covering both team and individual sports that include tennis golf and motor racing the handbook explores what we know what we do not

know what is stable what is changing what is certain and what is controversial in sports economics The expert contributors address issues in particular sports or comparisons among sports along major topics such as revenue and costs labor markets market structure market outcomes and public policy      Generalized Microeconomics Jiří Hlaváček, Michal Hlaváček, 2014-02-01 The generalization of microeconomics enables model descriptions of economic rationality even in fields that standard microeconomics more or less avoids like nonprofit sectors of market economies altruism or externalities Here the authors broaden the scope of microeconomics while treating standard profit maximization as a special case They argue ultimately that the generalizing criterion is a Darwinian maximization of the probability of survival      Annual Catalogue United States Air Force Academy, 1984      **Handbook of Entrepreneurship Research** Sharon A. Alvarez, Rajshree R. Agarwal, Olav Sorenson, 2006-03-30 early economic thinkers and classic works such as Cantillon 1755 Knight 1921 and Kirzner 1973 The paper opens by explaining how uncertainty and thus entrepreneurship disappeared from microeconomic theory as it became increasingly formalized and stylized It then goes on to bring the entrepreneur and entrepreneurial decision making back into economic theory by focusing on the interrelationships among actors knowledge and perceived economic opportunities using a resource based framework The third paper in this section Chapter 4 is by Foss and Klein Entrepreneurship and the Economic Theory of the Firm Any Gains from Trade Foss and Klein strongly link theories of the firm to entrepreneurship arguing a fundamental and intrinsic connection between the two They like Mahoney and Michael explain how entrepreneurship became less important in economic models as the general equilibrium model became dominant Foss and Klein ask Does the entrepreneur need a firm They focus on the judgment of the entrepreneur and suggest that this judgment is exercised through asset ownership and starting a firm Foss and Klein further argue that it is through this notion of judgment that heterogeneous assets combine to meet future wants      **Toward a Microeconomics of Growth** Robin Burgess, Anthony Venables, 2004      *Proceedings of Selected Research Paper Presentations at the ...
