**Microeconomics** Steve Erfle, 2017-09-14 The overarching premise of this text is that microeconomics is most effectively learned in an active learning interactive environment Students have access to more than 200 Interactive Excel Figures in the online text that allow them to move the graphs using sliders and click boxes This interactivity helps students understand how graphic elements relate to one another These files do not require knowledge of Excel More figures than are typical and many of the figures involve multiple scenarios of the same basic graph Often the text employs interactive questions that require interpreting these scenarios questions posed are answered at the bottom of the page Despite the geometric orientation this text is not light on algebraic analysis The geometry is backed up by the relevant algebra More than 500 equations are numbered for easy reference both within and across chapters And just like the geometry the algebra is essentially error free because it was used to create the graphs The geometric orientation is perfect for the non calculus enhanced classroom but the text can be readily used in a calculus based class because a calculus treatment of the material is provided in appendices and endnotes and calculus based problems are included in the Intermediate Microeconomics An Interactive Approach Workbook      **Environmental Economics** Dodo J. Thampapillai, Matthias Ruth, 2024-11-27 Environmental Economics

explores the ways in which economic theory and its applications as practised and taught today must be modified to explicitly accommodate the goal of sustainability and the vital role played by environmental capital Pivoting around the first and second laws of thermodynamics as well as the principles of ecological resilience this book is divided into five key parts which include extensive coverage of environmental microeconomics and macroeconomics It drills down into issues and challenges including consumer demand production and supply market organisation renewable and non renewable resources environmental valuation macroeconomic stabilisation and international trade and globalisation Drawing on case studies from forestry water soil air quality and mining this book will equip readers with skills that enable the analyses of environmental and economic policy issues with a specific focus on the sustainability of the economy This new edition has been updated throughout and provides further coverage on topics such as energy transition market organisation and the role of environmental economics in regulatory decision making including critiques of contemporary policy directives like tradable pollution permits and net zero emissions Challenges to achieving stabilisation and emission reduction have been expanded to include wars and conflicts such as those in the Middle East and the Russian invasion of Ukraine This book further reinforces the premise that there are clear limits to growth and that modesty and moderation are superior alternatives Rich in pedagogical features including key concept boxes and review questions at the end of each chapter this book will be a vital
