Activity Guide - Black and White Images

Building a Digital Image

Work to digitally represent the image below

- Read each square of the image and fill in the responses on the worksheet
- Enter the bits in Code Studio and use a timer to keep track of how long it takes
- Remember: Each bit can only be either black or white! You will have to decide for each square

Challenge A

When finished sampling, reflect on the following:

How many total bits were needed? _____

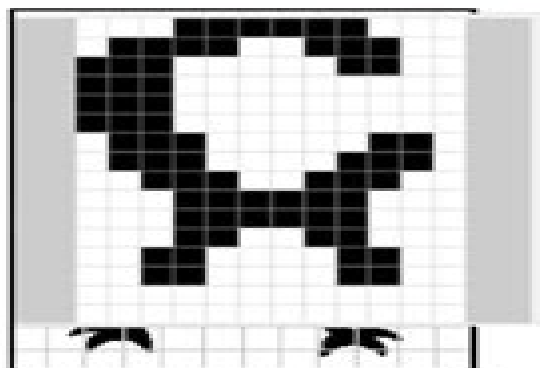

How long did it take to build? _____ It did not take that long, I just restarted twice which didn't delay any time. _____

How much does the digital image resemble this one? Why might that be the case?

It doesn't really resemble it and it's because I do not have enough pixels to work with, someone would have thought this was just a scribble.

Challenge B

This time, we will use sampling more frequently by reading the image using smaller squares.

How many total bits were needed? _____

How long did it take to build? This took me a little bit, I restarted a couple times, and I wanted it to look as detailed as possible.

How does the new digital image compare to the one from Challenge A? What effect did taking a larger number of samples have on the image?

The new image is a lot more detailed for the fact that there are more pixels than the other one, the other one looks like scribbles, this one may be a little more recognizable. It made a big difference when we added more samples, so that we can actually make it resemble the actual image we are trying to replicate.

Challenge C

Select your favorite company logo. Decide how you are going to sample this logo - use one of the grids below. Draw the logo.
