Fibrosis in the Respiratory and Digestive Systems Jian Gao,Yang Zhou,Jing Qu,Hong-Long Ji,2022-05-23 **Engineering Education for a Smart Society** Michael E. Auer,Kwang-Sun Kim,2017-07-05 This book presents selected papers from the World Engineering Education Forum Global Engineering Deans Council held in November 2016 in Seoul Korea The massive changes currently underway in all areas of society especially in engineering and consequently in engineering education call for new pedagogic qualifications and approaches To face these current real world challenges higher education has to find innovative ways to quickly respond to these new needs The papers gathered here address three essential problems The main approach to engineering in the 21st century is collaboration at many levels within universities or colleges between institutions and on a global scale At the same time we need a new quality of collaboration between academia industry professional and governmental organizations The complexity of engineering projects and solutions is rapidly growing and increasingly includes non technical aspects One of the key tasks for future engineers will be the development of a sustainable society which is essential to keeping the global environment in balance **Contemporary Natural Philosophy and Philosophies - Part 1** Gordana Dodig-Crnkovic,Marcin J. Schroeder,2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal Philosophies to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world both natural and human made while philosophies scrutinize the ontological epistemological and methodological foundations of sciences providing scientists with questions and conceptual analyses This is all directed at extending and deepening our existing comprehension of the world including ourselves both as humans and as societies and humankind
