

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the investigation. The investigator will identify the problem and then will determine the scope of the investigation. The investigator will then determine the objectives of the investigation and will then determine the methods of the investigation. The investigator will then determine the results of the investigation and will then determine the conclusions of the investigation. The investigator will then determine the recommendations of the investigation and will then determine the actions of the investigation. The investigator will then determine the follow-up of the investigation and will then determine the final report of the investigation.
