Three practice problems are provided at the end of each chapter along with their solutions in an Appendix. At the end of the Excel Guide, an additional Practice Exam allows the reader to test his or her understanding of each chapter by attempting to solve a specific educational or psychometrical issue or problem using Excel; the solution to this problem is also given in an Appendix. From the beginning of the book, readers/students are taught how to write their own formulas and then how to utilize Excel drop down formula menus as well for such exercises involving one way ANOVA, simple linear regression and multiple correlation.
