opens with Chapter 1 which introduces the concept of reading and its purposes such as reading for pleasure and reading for learning. It explores how reading in a second or foreign language differs from reading in one's first language and discusses the role of reading in overall language acquisition. Teachers are encouraged to reflect on their personal reading experiences and examine reading habits through surveys and journals. Chapter 2 presents key models of the reading process: bottom up, top down, and interactive models. It also introduces cognitive and sociocultural perspectives on reading. Teachers learn how to identify these models in real lesson plans and are challenged to design a mini lesson using one of the models. In Chapter 3, the focus shifts to reading fluency, covering components like accuracy rate and prosody. It contrasts extensive and intensive reading and discusses both silent reading and reading aloud. Teachers learn to design an extensive reading program and receive peer feedback on their fluency building activities. Vocabulary and its strong connection to reading comprehension are the main focus of Chapter 4. This chapter explains the importance of vocabulary depth and breadth and explores different ways of teaching vocabulary, including pre-teaching and encouraging incidental learning. Teachers are introduced to high frequency word lists such as the New General Service List (NGSL) and are tasked with creating vocabulary focused pre-reading activities. Chapter 5 discusses a range of reading comprehension strategies such as skimming, scanning, predicting, inferring, summarizing, and questioning. It introduces strategy instruction models and highlights the importance of teaching students how to use these strategies effectively. One key approach explored is Reciprocal Teaching. Teachers then apply their knowledge by designing a reading lesson centered on specific comprehension strategies. In Chapter 6, the book addresses the digital shift in reading behaviors. It explores how students read online, the skills required for digital literacy, and ways to integrate technology into the classroom through blogs, e-books, and reading apps. Teachers practice creating digital reading materials and activities suitable for EFL students. Chapter 7 focuses on content-based reading and critical literacy, encouraging teachers to use authentic texts and thematic units. It also highlights the importance of encouraging critical thinking through reading. Teachers learn to design interdisciplinary reading activities that connect reading with other subject areas. Chapter 8 explores how reading can be assessed in the EFL classroom. It covers principles of good assessment, including the use of formal and informal methods such as comprehension questions, rubrics, portfolios, and reading journals. Teachers are guided through the process of creating varied and effective reading comprehension tests. In Chapter 9, the book focuses on supporting diverse learners and addressing reading difficulties. It helps teachers understand how to diagnose challenges, differentiate instruction, and scaffold reading tasks to help students with limited literacy backgrounds. Teachers apply their knowledge by developing remedial reading plans tailored to specific learner needs. The final chapter, Chapter 10, brings together all the knowledge from previous chapters to guide teachers in designing a complete reading curriculum. It discusses how to conduct a needs analysis, set objectives, select appropriate materials, and sequence instruction. Teachers learn how to integrate reading into broader language curricula and develop a semester-long reading syllabus using materials
