The Lives of a Roman Neighborhood Paul W. Jacobs, II, 2022-12-01. In this book Paul Jacobs traces the history of a neighborhood situated in the heart of Rome over twenty five centuries. Here he considers how topography and location influenced its long urban development. During antiquity the forty

plus acre flood prone site on the Tiber's edge was transformed from a meadow near a crossroads into the imperial Circus Flaminius with its temples, colonnades and a massive theater. Later it evolved into a bustling medieval and early modern residential and commercial district known as the Sant Angelo rione. Subsequently the neighborhood enclosed Rome's Ghetto. Today it features an archaeological park and tourist venues and it is still the heart of Rome's Jewish community. Jacobs' study explores the impact of physical alterations on the memory of lost topographical features. He also posits how earlier development may be imprinted upon the landscape or preserved to influence future changes.

Studies in Hellenistic Architecture Frederick E. Winter, 2006-12-15 Studies in Hellenistic Architecture is a detailed analysis of the development of the major building types of the Hellenistic age, the mid fourth century B.C. to the time of the Roman conquest of the Eastern Mediterranean. In this meticulous work, Frederick E. Winter reveals how the architects of the period went beyond anything achieved by their Classical Greek predecessors and how these impressive skills prepared the way for many of Rome's later architectural achievements. Geographically, the monuments included in this volume extend from Spain to Afghanistan and from Provence to North Africa. Winter discusses the architectural achievements of the various regional styles of the Eastern Mediterranean and takes a detailed look at Hellenistic developments west of the Adriatic. While the interrelationship of these regional developments is often unclear, especially in cases where there are no explicit criteria for dating, Winter makes excellent use of the advance in scholarship over the past fifty to sixty years, offering the first real attempt at a synthesis of this vast subject. Studies in Hellenistic Architecture is an invaluable resource containing a wealth of illustrations of the various types of Hellenistic building and the most comprehensive scholarship to date on the topic.

Roman Archaeology for Historians Ray Laurence, 2012-06-25 Roman Archaeology for Historians provides students of Roman history with a guide to the contribution of archaeology to the study of their subject. It discusses the issues with the use of material and textual evidence to explain the Roman past and the importance of viewing this evidence in context. It also surveys the different approaches to the archaeological material of the period and examines key themes that have shaped Roman archaeology. At the heart of the book lies the question of how archaeological material can be interpreted and its relevance for the study of ancient history. It includes discussion of the study of landscape change, urban topography, the economy, the nature of cities, new approaches to skeletal evidence and artefacts in museums. Along the way, readers gain access to new findings and key sites, many of which have not been discussed in English before and many for which access may only be gained from technical reports. Roman Archaeology for Historians provides an accessible guide to the development of archaeology as a discipline and how the use of archaeological evidence of the Roman world can enrich the study of ancient history while at the same time encouraging the integration of material evidence into the study of the period's history. This work is a key resource for students of ancient history and for those studying the archaeology of the Roman period.
