eventually learn is that trading is far more difficult when your chips are down and the pressure is on In the tradition of Edwin Lefevre's legendary book *Reminiscences of a Stock Operator* Don Miller's *Chronicles of a Million Dollar Trader* offers an inside look at the ups and downs failures and victories of one of the few traders to have ever earned 1 million in a calendar year by trading futures intraday In this detailed journal Miller lets you peek over his shoulder as he tiptoes through a minefield of potential mistakes miscalculations and self defeating behaviors in search of consistent profits Along the way he shares trading diary excerpts from 2008 to 2012 as well as his actual performance for every futures trading day from 2004 to 2011 almost 2 000 days worth of real trading results and analysis You'll follow along as the challenge of everyday trading teaches Miller the importance of focus motivation controlled aggression and just showing up especially on those mornings he'd rather sleep in As you track his progress hour by hour and day by day through the journal you'll see how he recognizes his strengths and weaknesses reaches or falls short of his daily goals analyzes his results and applies everything he learns to future trades including valuable insights gleaned from sports poker and life If you're thinking of quitting your day job to be a full time trader Miller offers a clear eyed look at what you're getting into His path to success was rocky with ecstatic highs interspersed with intermittent setbacks Despite his well crafted plan his intelligence and his dedication Miller began his trading career the way so many others do with losses due to a lack of training and a poor business plan Though he learned his lesson ate his humble pie and got back into the game successfully there's no reason for you to repeat his mistakes *Chronicles of a Million Dollar Trader* reveals how successful trading is about much more than reading charts because you're not just playing the numbers you're competing against the markets other traders and yourself Much like a sport winning is the result of good planning practice and execution and if you're not on your game then you're already on your way to losing If you're a full time trader part time trader or just considering becoming one this insightful revealing look inside Miller's mind offers vital lessons on how to trade like a champion

**How We Decide** Jonah Lehrer, 2010-01-14 The first book to use the unexpected discoveries of neuroscience to help us make the best decisions Since Plato philosophers have described the decision making process as either rational or emotional we carefully deliberate or we blink and go with our gut But as scientists break open the mind's black box with the latest tools of neuroscience they're discovering that this is not how the mind works Our best decisions are a finely tuned blend of both feeling and reason and the precise mix depends on the situation When buying a house for example it's best to let our unconscious mull over the many variables But when we're picking a stock intuition often leads us astray The trick is to determine when to use the different parts of the brain and to do this we need to think harder and smarter about how we think Jonah Lehrer arms us with the tools we need drawing on cutting edge research as well as the real world experiences of a wide range of deciders from airplane pilots and hedge fund investors to serial killers and poker players Lehrer shows how

people are taking advantage of the new science to make better television shows win more football games and improve military intelligence His goal is to answer two questions that are of interest to just about anyone from CEOs to firefighters How does the human mind make decisions And how can we make those decisions better     **Gale Force** Owen
