Provided by publisher Building Continents of Knowledge in Oceans of Data: The Future of Co-Created EHealth A. Ugon, D. Karlsson, G.O. Klein, 2018-05-18. The domain of eHealth faces ongoing challenges to deliver 21st century healthcare. Digitalization, capacity building and user engagement with truly interdisciplinary and cross domain collaboration are just a few of the areas which must be addressed. This book presents 190 full papers from the Medical Informatics Europe MIE 2018 conference held in Gothenburg, Sweden, in April 2018. The MIE conferences aim to enable close interaction and networking between an international audience of academics, health professionals, patients and industry partners. The title of this year's conference is Building Continents of Knowledge in Oceans of Data: The Future of Co-Created eHealth and contributions cover a broad range of topics related to the digitalization of healthcare: citizen participation, data science and changing health systems, addressed from the perspectives of citizens, patients and their families, healthcare professionals, service providers, developers and policy makers. The second part of the title, in particular, has attracted a large number of papers describing strategies to create, evaluate, adjust or deliver tools and services for improvements in healthcare organizations or to enable citizens to respond to the challenges of dealing with health systems. Papers are grouped under the headings: standards and interoperability, implementation and evaluation, knowledge management, decision support, modeling and analytics, health informatics, education and learning systems and patient centered services. Attention is also given to development for sustainable use, educational strategies and workforce development and the book will be of interest to both developers and practitioners of healthcare services.
