

In the drop tower shown, containers with experiments inside of them are fired upwards inside a vertical tower.

The container moves under the influence of gravity and eventually falls back to the bottom of the tower. Most of the air is removed from the tower so that air resistance is negligible. While in flight, the container and its contents are in free-fall.

- (a) The container is fired vertically upwards with initial speed 48 m s^{-1} . Determine the time that the container is in flight.
