**Software Engineering for Modern Web Applications: Methodologies and Technologies** Brandon, Daniel M., 2008-06-30 This book presents current effective software engineering methods for the design and development of modern Web based applications. Provided by publisher [Neokognitron und Hopfield Netz als künstliche neuronale Netze zur Mustererkennung: Theorie, computergestützte Simulation und Anwendungen](#) Raoul Privenau, 2012-03 Das menschliche Gehirn empfängt eine Fülle unterschiedlicher Reize über verschiedene Sinnesorgane, wobei die visuelle Wahrnehmung in diesem Zusammenhang ein bedeutendes Gebiet darstellt. Der Mensch ist in der Lage aus einer großen Menge visueller Reize bestimmte Signale innerhalb kürzester Zeit herauszufiltern und richtig zu interpretieren. Probleme ergeben sich allerdings bei der Portierung der natürlichen Mustererkennung auf Computersysteme. Nach dem derzeitigen technischen Stand können Computer Daten zwar um ein Vielfaches schneller verarbeiten als unser Gehirn, sind aber dennoch mit Mustererkennungsaufgaben überfordert, die das Gehirn in kürzester Zeit erfolgreich durchläuft. Ein Ansatz zur Nachahmung der natürlichen Mustererkennungsprozesse sind künstliche neuronale Netze als stark vereinfachte Modelle des Gehirns. Besonders das Neokognitron verspricht eine hohe Eignung zur Umsetzung dieser Aufgabe. Dieses Buch gibt zun

chst eine Einführung in das Gebiet der Mustererkennung und vermittelt die notwendigen Grundlagen zu künstlichen neuronalen Netzen. Der Fokus liegt auf der strukturellen und funktionalen Darstellung des ursprünglichen Neokognitrons bei der Mustererkennung. Den dabei identifizierten Problemen begegnet man mit verschiedenen Erweiterungen, deren wesentliche Eigenschaften im Überblick dargestellt werden. Zur Veranschaulichung der praktischen Leistungsfähigkeit werden Anwendungen aufgezeigt, für die das Neokognitron implementiert wurde. Neben dem Neokognitron wird auch das binäre Hopfield Netz als klassisches künstliches neuronales Netz zur Mustererkennung erläutert. Entsprechend dieser Ausführungen wurde zusätzlich zum vorliegenden Buch ein E-Learning Modul für binäre Hopfield Netze prototypisch implementiert und wird hier vorgestellt.

## **Approaches to Specialised Discourse in Higher Education and Professional Contexts** Alejandro Curado

Fuentes, Mercedes Rico García, Patricia Edwards Rokowski, 2009-03-26 Approaches to Specialised Discourse in Higher Education and Professional Contexts brings together a number of studies by various authors in the common field of languages for specific purposes LSP This area faces a major challenging need to work with both specialised content and language a complex combination which can be discouraging to many a language teacher from a traditional philological background In the introduction to this volume Dr Martin Hewings asks how these teachers as mere onlookers on specialist areas in higher education and the professions are successfully to teach students communication skills The answer is most probably contained in no single approach or scope but rather in a multiple probing of methods aimed at the empirical observation and analysis of language use in the specific contexts in which they are housed The studies presented herein illustrate such a multi fold scenario analysing and sharing significant findings on discourse across academic disciplines and professional areas The authors not only evince the importance of the various methodologies adopted but also in their role as teachers and researchers demonstrate the significance of working as integrated members in the fields they teach Clearly reflected in this volume is the natural adaptation of LSP research pushing beyond theory to filter into classroom developments and professional interactions The fact that these papers have been selected from the fourth conference by the European Association of Languages for Specific Purposes AELFE held in Spain October 2005 indicates that the LSP community tends to look into the blend of practice and research as a key exponent for successful learning integration Because the linguist is also the LSP practitioner or vice versa the enquiries that conduct these chapters are commonly addressed either implicitly or openly by students and teachers alike For readers who would like to learn or know more about communicative strategies and methodological approaches in different specialisms this book may be a valuable resource
