## Reader's Theater

Name \_\_\_\_\_ Date \_\_\_\_\_

Welcome to our program, welcome to our show. This is the story of the Little Red Hen, it is a story you all know.

Sit back and relax, please enjoy the time.  
Look, the Little Red Hen just found something fine!

I just found a grain of wheat! We could plant it, grow the wheat, harvest it, and make it into bread! Who will help me plant it?

How do you do that?

You put your rake in, your put your rake out. You do the cokey pokey, and turn that dirt around. That's what its all about.

Not I, I have to sit in the warm sun.

I can't, I have to eat my cheese.

Oh, no, not me. I have to bury my bone.

No way! I have to swim in the pond.

Very, well, I'll do it myself.

Keith Sawyer, 2013-01-11 Everyday conversations including gossip boasting flirting teasing and informative discussions are highly creative improvised interactions Children's play is also an important often improvisational activity One of the most improvisational games among 3 to 5 year old children is social pretend play also called fantasy play sociodramatic play or role play Children's imaginations have free reign during pretend play Conversations in these play episodes are far more improvisational than the average adult conversation Because pretend play occurs in a dramatized fantasy world it is less constrained by social and physical reality This book adds to our understanding of preschoolers pretend play by examining it in the context of a theory of improvisational performance genres This theory derived from in depth analyses of the implicit and explicit rules of theatrical improvisation proves to generalize to pretend play as well The two genres share several characteristics There is no script they are created in the moment There are loose outlines of structure which guide the

performance They are collective no one person decides what will happen Because group improvisational genres are collective and unscripted improvisational creativity is a collective social process The pretend play literature states that this improvisational behavior is most prevalent during the same years that many other social and cognitive skills are developing Children between the ages of 3 and 5 begin to develop representations of their own and others mental states as well as learn to represent and construct narratives Freudian psychologists and other personality theorists have identified these years as critical in the development of the personality The author believes that if we can demonstrate that children s improvisational abilities develop during these years and that their fantasy improvisations become more complex and creative it might suggest that these social skills are linked to the child s developing ability to improvise with other creative performers [Resources in Education](#) ,2000-04
