acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do *Unmanned Combat Air Systems in Future Warfare* C. who want accessible and engaging accounts of ordinary people struggling to overcome poverty **Hong Kong Professional Services and the Belt and Road Initiative** Linda Chelan Li, Phyllis Lai Lan Mo, 2023-03-03 This book scrutinizes the role of Hong Kong in the expansive and contested vision of China's Belt and Road Initiative BRI. In two main parts it first discusses the defining features of the BRI and the evolving expectations of the role of Hong Kong in the BRI from the perspectives of policy makers and the professional sectors of accountancy, finance and the law. The second part contemplates the potential opportunities for Hong Kong from the perspectives of recipient countries: Sri Lanka, Vietnam, Cambodia and Myanmar. Utilizing an action research approach and engaging the views of a broad spectrum of actors, the authors observe the critical role of agency and innovations in a context of institutional contradictions: the impact of BRI governance structure for the deficits in international participation gaps between grand state visions and commercial interests and the salience of effective communication in navigating complex policy initiatives. Taking these together unpacks the complex processes shaping Hong Kong's participation and role in the BRI. This book will appeal to students and researchers interested in the BRI and Hong Kong in the contexts of institutional contradictions, agency innovations and political dynamics as well as sustainable development.

On the Trail of Capital Flight from Africa Léonce Ndikumana, James K. Boyce, 2021-12-23 On the Trail of Capital Flight from Africa investigates the dynamics of capital flight from Angola, Côte d'Ivoire and South Africa, countries that have witnessed large scale illicit financial outflows in recent decades. Quantitative, qualitative and institutional analysis for each country is used to examine the modus operandi of capital flight: that is, the who, how and where dimensions of the phenomenon. Who refers to major domestic and foreign players; how refers to mechanisms of capital acquisition, transfer and concealment; and where refers to the destinations of capital flight and the transactions involved. The evidence reveals a complex network of actors and enablers involved in orchestrating and facilitating capital flight and the accumulation of private wealth in offshore secrecy jurisdictions. This underscores the reality that capital flight is a global phenomenon and that measures to curtail it are a shared responsibility for Africa and the global community. Addressing the problem of capital flight and related issues such as trade misinvoicing, money laundering, tax evasion and theft of public assets by political and economic elites will require national and global efforts with a high level of coordination.

Routledge Handbook of Deradicalisation and Disengagement Stig Jarle Hansen, Stian Lid, 2020-02-18 The Routledge Handbook of Deradicalisation and Disengagement offers an overview of the historical settings, theoretical debates, national approaches and practical strategies to deradicalisation and disengagement. Radicalisation and violent extremism are major global challenges and as new and violent extremist groups and environments emerge, there is an increasing need for knowledge about how individuals physically exit these movements and how to change their mindset. Historically, much of the focus on these topics has been highly securitised and militarised; by contrast, this volume explores the need for more community based and soft approaches. The handbook includes discussions from both right wing, left wing, political and

religiously inspired deradicalisation processes The handbook is organised into three parts 1 definitions backgrounds and theories 2 actors 3 regional case studies This handbook will be of much interest to students researchers scholars and professionals of deradicalisation counterterrorism political violence political extremism security studies and international relations in general *Sustainable Railway Futures* Professor Becky P Y Loo, Professor Claude Comtois, 2015-04-28

Revitalizing railways as a major sustainable transport mode in modern societies faces many issues and challenges This in depth overview places the importance of railways in the wider context of comprehensive sustainability which encompasses sustainable development social and economic equity and community livability Some scholars have described the 21st century as a period of renaissance for railways and suggest this transport mode can fulfil people s desire for high mobility with low negative environmental social economic and financial impacts In light of these new expectations for railways in both passenger and freight transport worldwide this book offers the latest research insights on the renewed interest about railway expansions and their wide ranging environmental socio economic and even political implications **Secrecy, Law and**

Society Greg Martin, Rebecca Scott Bray, Miiko Kumar, 2015-05-08 Commentators have shown how a culture of security ushered in after the terrorist attacks of 11 September 2001 has involved exceptional legal measures and increased recourse to secrecy on the basis of protecting public safety and safeguarding national security In this context scholars have largely been preoccupied with the ways that increased security impinges upon civil liberties While secrecy is justified on public interest grounds there remains a tension between the need for secrecy and calls for openness transparency and disclosure In law secrecy has implications for the separation of powers due process and the rule of law raising fundamental concerns about open justice procedural fairness and human rights Beyond the counterterrorism and legal context scholarly interest in secrecy has been concerned with the credibility of public and private institutions as well as the legacies of secrecy across a range of institutional and cultural settings By exploring the intersections between secrecy law and society this volume is a timely and critical intervention in secrecy debates traversing various fields of legal and social inquiry It will be a useful resource for academic researchers university teachers and students as well as law practitioners and policymakers interested in the legal and socio legal dimensions of secrecy Judicial institutionalization of integration processes Ricardo

Caichiolo, 2016-09-07 The focus of this book is the judicial institutionalization of integration processes through the development of dispute settlement mechanisms more specifically in the Common Market of the South MERCOSUR to date the most important regional bloc in Latin America The bloc has been in existence since 1991 and has positioned itself as one of the potential regional blocs for trade and investment while becoming one of the important actors in the international community However its achievements have been tainted by the gaps and problems attached to the core foundation of the regional bloc MERCOSUR has been suffering or experiencing internal disputes and disunity due to its complex and low institutionalization a situation which can be seen as being paradoxical Its current Dispute Settlement Mechanism is subject

to uncertainty and doubt since its own framework is also under internal and external criticism There has been a series of protocols made in order to tackle the problems of the DSM and to further fix the problems that hinder the cooperation as well as the productivity of MERCOSUR s intra organisation all guided by intergovernmental decision making As such this book seeks to tackle the concept of regionalism and the possible models which have been used or have influenced the establishment of MERCOSUR while discussing the different aspects and developments of each intra organisation This is done in order to evaluate the nature of the problem and future developments that could take place The book also focuses on the prevalence of politicization in MERCOSUR and the pre eminence of Presidential Diplomacy over the path of regional integration which influence the DSM of MERCOSUR and possible developments that might occur in the near future

Ethnographies of U.S. Empire Carole McGranahan, John F. Collins, 2018-08-02 How do we live in and with empire The contributors to *Ethnographies of U S Empire* pursue this question by examining empire as an unequally shared present Here empire stands as an entrenched if often invisible part of everyday life central to making and remaking a world in which it is too often presented as an aberration rather than as a structuring condition This volume presents scholarship from across U S imperial formations settler colonialism overseas territories communities impacted by U S military action or political intervention Cold War alliances and fissures and most recently new forms of U S empire after 9 11 From the Mohawk Nation Korea and the Philippines to Iraq and the hills of New Jersey the contributors show how a methodological and theoretical commitment to ethnography sharpens all of our understandings of the novel and timeworn ways people live thrive and resist in the imperial present Contributors Kevin K Birth Joe Bryan John F Collins Jean Dennison Erin Fitz Henry Adriana Mar a Garriga L pez Ol via Maria Gomes da Cunha Matthew Gutmann Ju Hui Judy Han J K haulani Kauanui Eleana Kim Heonik Kwon Soo Ah Kwon Darryl Li Catherine Lutz Sunaina Maira Carole McGranahan Sean T Mitchell Jan M Padios Melissa Rosario Audra Simpson Ann Laura Stoler Lisa Uperesa David Vine Israel's Mediterranean Gas Sujata

Ashwarya, 2019-05-03 This book examines the internal and external implications of Israel s natural gas discoveries in the Eastern Mediterranean The nation s changed status from being an importer of coal and oil to that of an exporter of natural gas has consequences not only for the energy sector but also for the fragile geopolitics of the region The book Explores the challenges and issues of energy economics and governance Analyses Israel s gas diplomacy with its neighbours in the Middle East and North Africa and its potential positive impact on the amelioration of the Arab Israeli conflict Studies how Israel can avoid the deleterious impact of the Dutch disease once the government s share of the export revenues start flowing The author traces a consummate picture of history politics and conflicts that shape the economics of energy in Israel and its future trajectories A major intervention in Middle East studies this volume will be of great interest to scholars and researchers of energy studies development studies strategic studies politics diplomacy and international relations It will also be of interest to government agencies think tanks and risk management firms Central Banks as Fiscal Players Willem

Buiter,2020-11-12 It is well known that the balance sheets of most major central banks significantly expanded in the aftermath of the financial crisis of 2007 2011 but the consequences of this expansion are not well understood This book develops a unified framework to explain how and why central bank balance sheets have expanded and what this shift means for fiscal and monetary policy Buiter addresses a number of key issues in monetary economics and public finance including how helicopter money works when modern monetary theory makes sense why the Eurosystem has a potentially fatal design flaw why the fiscal theory of the price level is a fallacy and how to escape from the zero lower bound *Sustainable*

Cropping Systems Jeffrey A. Coulter,2020-05-21 Global crop production must substantially increase to meet the needs of a rapidly growing population This is constrained by the availability of nutrients water and land There is also an urgent need to reduce the negative environmental impacts of crop production Collectively these issues represent one of the greatest challenges of the twenty first century Sustainable cropping systems based on ecological principles are the core of integrated approaches to solve this critical challenge This special issue provides an international basis for revealing the underlying mechanisms of sustainable cropping systems to drive agronomic innovations It includes review and original research articles that report novel scientific findings on improvement in cropping systems related to crop yields and their resistance to biotic and abiotic stressors resource use efficiency environmental impact sustainability and ecosystem services **International**

Cooperation Against All Odds Mai'a K. Davis Cross,2023-10-19 International Cooperation Against All Odds The Ultrasocial World recasts how we understand international relations through an examination of how the human evolutionary predisposition to be ultrasocial as a species impacts which political ideas succeed transform manipulate and inspire on a global scale At a time when pessimism about our current world order is at an all time high this book overturns widespread assumptions that international relations is mainly about conflict power and national self interest In the last 10 20 years scientists have discovered that as a species we are biologically hard wired soft wired and pre wired to be other regarding and cooperative Humans are an ultrasocial species and yet this predisposition is completely ignored in governments across the world Political leaders experts and the media have cultivated a myopic vision of global conflict feeding an obsession on crises of the moment rather than recognizing frequent and significant breakthroughs in peaceful cooperation and overall trends in the decline of violence This book shows how time and time again our ultrasocial predisposition has pushed us towards big ideas that inspire and bring us together around the power of possibility Featuring original research on international cooperation in outer space exploration European Union integration nuclear weapons and climate change among other examples Mai a K Davis Cross shows ultrasociality at work in a range of contexts Tracing the path from social neuroscience and evolutionary biology among others to the power of ideas to international agreements International Cooperation Against All Odds opens up an entirely new understanding of world politics If we recognize our nature as a species and the potential we have to work together we can start to transform institutions and devise policies that take advantage of this The book ends

with a roadmap to promote more international cooperation and eventually a more stable peaceful world order
