Materializing the Middle Passage Jane Webster,2023-10-31 An estimated 2 7 million Africans made an enforced crossing of the Atlantic on British slave ships between c 1680 and 1807 a journey that has become known as the Middle Passage This book focuses on the slave ship itself The slave ship is the largest artefact of the Transatlantic slave trade but because so few examples of wrecked slaving vessels have been located at sea it is rarely studied by archaeologists Materializing the Middle Passage A Historical Archaeology of British Slave Shipping 1680 1807 argues that there are other ways for archaeologists to materialize the slave ship It employs a pioneering interdisciplinary methodology combining

primary documentary sources maritime and terrestrial archaeology paintings maritime and ethnographic museum collections and many other sources to rebuild British slaving vessels and to identify changes to them over time The book then goes on to consider the reception of the slave ship and its trade goods in coastal West Africa and details the range and uses of the many African resources including ivory gold and live animals entering Britain on returning slave ships The third section of the book focuses on the Middle Passage experiences of both captives and crews and argues that greater attention needs to be paid to the coping mechanisms through which Africans survived yet also challenged their captive passage Finally Jane Webster asks why the African Middle Passage experience remains so elusive even after decades of scholarship dedicated to uncovering it She considers when how and why the crossing was remembered by saltwater captives in the Caribbean and North America The marriage of words and things attempted in this richly illustrated book is underpinned throughout by a theoretical perspective combining creolization and postcolonial theory and by a central focus on the materiality of the slave ship and its regimes

Power, Perception, and Politics in the Making of Iranian Grand Strategy Kevjn Lim, 2022-07-04 This book explains changes to Iranian grand strategy over the past four decades and it does so by advancing a multicausal model that unifies the three main paradigms of International Relations IR theory Hence ideas constructivism mediate between the structure of material capabilities realism and agents liberalism and interact with each to produce respectively threat perception and political preferences Using these two explanatory factors the author demonstrates how the Islamic Republic's grand strategy has systematically varied over time to produce a mix of outcomes that includes balancing expansionism bandwagoning appeasement engagement and retrenchment Beyond its theoretical contribution this book is policy relevant in that it explains and predicts the external conduct of what is arguably the Middle East's most consequential actor with implications reverberating far beyond the region Academic in conception and rigor the book is intended not only for specialists and practitioners but appeals to the lay reader interested in the broader Middle East West Asia the region's relationship with major powers and regional conflict dynamics

The Fall of France in the Second World War Richard Carswell, 2019-02-01 This book examines how the fall of France in the Second World War has been recorded by historians and remembered within society It argues that explanations of the fall have usually revolved around the four main themes of decadence failure constraint and contingency It shows that the dominant explanation claimed for many years that the fall was the inevitable consequence of a society grown rotten in the inter war period This view has been largely replaced among academic historians by a consensus which distinguishes between the military defeat and the political demise of the Third Republic It emphasizes the contingent factors that led to the military defeat At the same time it seeks to understand the constraints within which France's policy makers were required to act and the reasons for their policy making failures in economics defence and diplomacy

Notebooks, English Virtuosi, and Early Modern Science Richard Yeo, 2014-03-01 In *Notebooks, English Virtuosi, and Early Modern Science* Richard Yeo interprets a relatively unexplored set of primary

archival sources the notes and notebooks of some of the leading figures of the Scientific Revolution Notebooks were important to several key members of the Royal Society of London including Robert Boyle John Evelyn Robert Hooke John Locke and others who drew on Renaissance humanist techniques of excerpting from texts to build storehouses of proverbs maxims quotations and other material in personal notebooks or commonplace books Yeo shows that these men appreciated the value of their own notes both as powerful tools for personal recollection and following Francis Bacon as a system of precise record keeping from which they could retrieve large quantities of detailed information for collaboration The virtuosi of the seventeenth century were also able to reach beyond Bacon and the humanists drawing inspiration from the ancient Hippocratic medical tradition and its emphasis on the gradual accumulation of information over time By reflecting on the interaction of memory notebooks and other records Yeo argues the English virtuosi shaped an ethos of long term empirical scientific inquiry

Shakespeare's Apprenticeship Ramon Jiménez,2018-09-24 The contents of the Shakespeare canon have come into question in recent years as scholars add plays or declare others only partially his work Now new literary and historical evidence demonstrates that five heretofore anonymous plays published or performed during his lifetime are actually his first versions of later canonical works Three histories The Famous Victories of Henry the Fifth The True Tragedy of Richard the Third and The Troublesome Reign of John a comedy The Taming of a Shrew and a romance King Leir are products of Shakespeare's juvenile years Later in his career he transformed them into the plays that bear nearly identical titles Each is strikingly similar to its canonical counterpart in terms of structure plot and cast though the texts were entirely rewritten Virtually all scholars critics and editors of Shakespeare have overlooked or disputed the idea that he had anything to do with them This addition of five plays to the Shakespeare canon introduces a new facet to the authorship debate and supplies further evidence that the real Shakespeare was Edward de Vere seventeenth Earl of Oxford

The Wall and the Gate Michael Sfard,2018-01-23 A farmer from a village in the occupied West Bank cut off from his olive groves by the construction of Israel's controversial separation wall asked Israeli human rights lawyer Michael Sfard to petition the courts to allow a gate to be built in the wall While the gate would provide immediate relief for the farmer would it not also confer legitimacy on the wall and on the court that deems it legal The defense of human rights is often marked by such ethical dilemmas which are especially acute in Israel where lawyers have for decades sought redress for the abuse of Palestinian rights in the country's High Court that is in the court of the abuser This book chronicles this struggle a story that

has never before been fully told and in the process engages the core principles of human rights legal ethics The author recounts the unfolding of key cases and issues ranging from confiscation of land deportations the creation of settlements punitive home demolitions torture and targeted killings all actions considered violations of international law In the process he lays bare the reality of the occupation and the lives of the people who must contend with that reality He also exposes the surreal legal structures that have been erected to put a stamp of lawfulness on an extensive program of dispossession Finally he weighs the success of the legal effort reaching conclusions that are no less paradoxical than the fight itself
