Formulas and Functions

Project Description:

In the following project, you will perform preliminary work on the gym worksheet. You will then calculate cost, annual total, and total due. You will also determine the down payment and balance of gym membership. Your last steps will be to calculate the monthly payment and finalized the workbook.

Instructions:

For the purpose of grading the project you are required to perform the following tasks:

Step	Instructions	Points Possible
1	Download and open the file named <code>exploring_e02_grader_h1.xlsx</code> , and then save the file as <code>exploring_e02_grader_h1_LastFirst</code> . Click OK in the message regarding the circular reference. Hint: LastFirst refers to your name.	0
2	Create a named range for cells A18:C20 named Membership . Hint: Select the range A18:C20. Click in the Name box, type Membership and then press ENTER. An alternate way of creating a named range is by using the Name Manager, located within the Formulas ribbon.	5
3	Insert a function to enter the current date in cell B2. Hint: - In cell B2, type <code>=TODAY()</code> and then press ENTER. This Excel function is an example of one that requires no arguments (parameters). However, most Excel functions require one or more arguments. - Ensure the function returns only the date, and not both the date and time.	5

Solved Practical Problems in Transportation Engineering Ghazi G. Al-Khateeb, 2022-09-23 The book presents engineering concepts techniques practices principles standard procedures and models that are applied and used to design and evaluate traffic systems road pavement structures alternatives of transportation systems roadway horizontal and vertical alignments to ultimately achieve safety sustainability efficiency and cost effectiveness The book provides plentiful number of problems on five major areas of transportation engineering and includes broad range of ideas and practical problems that are included in all topics of the book Furthermore the book covers problems dealing with theory concepts practice and applications The solution of each problem in the book follows a step by step procedure that includes the theory and the derivation of the formulas in some cases and the computations Moreover almost all problems in the five parts of the book include detailed calculations that are solved using the MS Excel worksheets where mathematical trigonometric statistical and logical formulas are used to obtain a more rapid and efficient solution In some cases the MS Excel solver tool is used for solving complex equations in several problems of the book Additionally numerical methods linear algebraic methods and least squares regression techniques are utilized in some problems to assist in solving the problem and make the solution much easier The book will help academics and professionals to find practical solutions across the spectrum of transportation engineering The book is designed to be informative and filled with an abundance of solutions to problems in the engineering science of transportation It is expected that the book will enrich the knowledge and science in transportation engineering thereby elevating the civil engineering profession in general and the transportation engineering practice in particular as well as advancing the transportation engineering field to the best levels possible FEATURES Presents coverage of five major areas in transportation engineering traffic engineering pavement materials analysis and design urban transportation planning highway surveying and geometric design of highways Provides solutions to numerous practical problems in transportation engineering including terminology theory practice computation and design Includes downloadable and user friendly MS Excel spreadsheets as well as numerical methods and optimization tools and techniques Includes several practical case studies throughout Implements a unique kind of approach in presenting the different topics Introduction to Chemical Engineering Computing Bruce A. Finlayson, 2006-02-10 An innovative introduction to chemical engineering computing As chemical engineering technology advances so does the complexity of the problems that arise The problems that chemical engineers and chemical engineering students face today can no longer be answered with programs written on a case by case basis Introduction to Chemical Engineering Computing teaches professionals and students the kinds of problems they will have to solve the types of computer programs needed to solve these problems and how to ensure that the problems have been solved correctly Each chapter in Introduction to Chemical Engineering Computing contains a description of the physical problem in general terms and in a mathematical context thorough step by step instructions numerous examples and

comprehensive explanations for each problem and program This indispensable text features Excel MATLAB r Aspen PlusTM and FEMLAB programs and acquaints readers with the advantages of each Perfect for students and professionals

Introduction to Chemical Engineering Computing gives readers the professional tools they need to solve real world problems involving Equations of state Vapor liquid and chemical reaction equilibria Mass balances with recycle streams Mass transfer equipment Process simulation Chemical reactors Transfer processes in 1D Fluid flow in 2D and 3D Convective diffusion equations in 2D and 3D

, Programming Excel with VBA and .NET Jeff Webb, Steve Saunders, 2006-04-25 Why program Excel For solving complex calculations and presenting results Excel is amazingly complete with every imaginable feature already in place But programming Excel isn't about adding new features as much as it's about combining existing features to solve particular problems With a few modifications you can transform Excel into a task specific piece of software that will quickly and precisely serve your needs In other words Excel is an ideal platform for probably millions of small spreadsheet based software solutions The best part is you can program Excel with no additional tools A variant of the Visual Basic programming language VB for Applications VBA is built into Excel to facilitate its use as a platform With VBA you can create macros and templates manipulate user interface features such as menus and toolbars and work with custom user forms or dialog boxes VBA is relatively easy to use but if you've never programmed before Programming Excel with VBA and NET is a great way to learn a lot very quickly If you're an experienced Excel user or a Visual Basic programmer you'll pick up a lot of valuable new tricks Developers looking forward to NET development will also find discussion of how the Excel object model works with NET tools including Visual Studio Tools for Office VSTO This book teaches you how to use Excel VBA by explaining concepts clearly and concisely in plain English and provides plenty of downloadable samples so you can learn by doing You'll be exposed to a wide range of tasks most commonly performed with Excel arranged into chapters according to subject with those subjects corresponding to one or more Excel objects With both the samples and important reference information for each object included right in the chapters instead of tucked away in separate sections Programming Excel with VBA and NET covers the entire Excel object library For those just starting out it also lays down the basic rules common to all programming languages With this single source reference and how to guide you'll learn to use the complete range of Excel programming tasks to solve problems no matter what your experience level

Flash Programming for the Social & Behavioral Sciences: A Simple Guide to Sophisticated Online Surveys and Experiments Yana Weinstein, 2012-03-15 Adobe Flash is one of the most popular languages for animated web content and recently social and behavioural scientists have started to take advantage of it to collect data online This book is a unique step by step guide to using Adobe Flash to develop experiments and other research tools No previous knowledge of programming is required though general computer literacy is assumed *Intermediate Microeconomics* Steve Erfle, 2017-09-14 The overarching premise of this text is that microeconomics is most effectively learned in an active learning interactive environment Students have access to more than 200 Interactive Excel Figures in the online text that allow them to move the graphs using sliders and click boxes This interactivity helps students understand how graphic elements relate to one another These files do not require knowledge of Excel More figures than are typical and many of the figures involve multiple scenarios of the same basic graph Often the text employs interactive questions that require interpreting these scenarios questions posed are answered at the bottom of the page Despite the geometric orientation this text is not light on algebraic analysis The geometry is backed up by the relevant algebra More than 500 equations are numbered for easy reference both within and across chapters And just like the geometry the algebra is essentially error free because it was used to create the graphs The geometric orientation is perfect for the non calculus enhanced classroom but the text can be readily used in a calculus based class because a calculus treatment of the material is provided in appendices and endnotes and calculus based problems are included in the *Intermediate Microeconomics An Interactive Approach Workbook* **Analytical Chemistry** Gary D. Christian, Purnendu K. Dasgupta, Kevin A. Schug, 2013-10-07 With the 7th Edition of Analytical Chemistry renowned chemists Purnendu Sandy Dasgupta and Kevin Schug both of the University of Texas Arlington join the author team The new edition focuses on more in depth coverage of the principles and techniques of quantitative analysis and instrumental analysis

aka Analytical Chemistry The goal of the text is to provide a foundation of the analytical process tools and computational methods and resources and to illustrate with problems that bring realism to the practice and importance of analytical chemistry It is designed for undergraduate college students majoring in chemistry and in fields related to chemistry
