B - INSTALLING PERMANENT GENERATING SETS

PREPARATION :

The installation of a generating set must follow certain rules, which must be strictly adhered to in order to get equipment to operate properly.

The generator is liable to sustain damage and abnormal wear if these basic principles are not followed.

This manual lists the main installation requirements for a "conventional" generating set built with an I.C. engine, a generator and a control panel. In case of special applications our Technical Department will advise you and study your specific needs. The regulations provisions and laws in effect on the installation premises should also be complied with.
