Letters Using Architecture:

Standard Letters in Architectural Practice David Chappell, 2008-04-15 Architects and contract administrators spend a great deal of time writing letters of various types. Many of them are routine and repetitive in character but they require proper consideration if potentially dangerous liability situations are to be avoided. This book provides some 285 standard letters for use at all stages of project administration. To assist the user they are grouped into sections which correspond with the RIBA Plan of Work; the aim is to cover all the common situations encountered in practice. The book has been revised to take account of the latest contract revisions and many letters have been added. Unless otherwise stated all letters are suitable for use with JCT 98 WCD 98 IFC 98 MW 98 GC Works 1 1998. The latest edition also takes account of the three new RIBA Standard Forms of Agreement for Appointment of an Architect SFA 99 CE 99 and SW 99. Although primarily written for architects and contract administrators the book will also be of use to project managers and employers' agents under WCD 98. Contractors will also find much of interest.

Wakita, Richard M. Linde, 2003-02-03. The practical comprehensive handbook to creating effective architectural drawings. In one beautifully illustrated volume. The Professional Practice of Architectural Working Drawings presents the full range of skills, concepts, principles and applications needed to create a full set of architectural working drawings. This new Third Edition emphasizes the importance of communicating general design concepts through specific working drawings. Chapters proceed logically through each stage of development beginning with site and foundation plans and progressing to elevations, building sections and other drawings. New features of this Third Edition include coverage of the latest CAD technologies and techniques, environmental and human design considerations, supplemental step by step instructions for complex chapters, ten case studies including five fully evolved case studies, hundreds of additional computer generated drawings and photographs including three dimensional models and full size buildings shown in virtual space. Tips for establishing a strategy for developing construction documents. This new edition also presents completely updated material on metric conversions, code analysis, masonry and steel. Sets of working drawings for five different buildings are followed layer by layer from design concept through the finished construction documents. A companion Web site www.wiley.com/go/wakita includes summaries for each chapter, a glossary, review questions, laboratory problems, access to dozens of CAD drawings, a complete study guide and much more. The Professional Practice of Architectural Working Drawings Third Edition is an invaluable book for students in architecture, construction, engineering, interior design and environmental design.
