Reconceptualizing English Education in a Multilingual Society Isabel Pefianco Martin, 2018-03-01 This book brings together chapters that describe, investigate and analyze the place of English in education in multilingual Philippines. Unlike most studies on languages in education which take a neutral de-contextualized stance, this volume takes a pluricentric view of the English language by positioning it in relation to its varieties as well as to other languages in the country. Because of the changing realities of English in the Philippines, traditional assumptions about the language as monolithic and unchanging as well as about how it should be taught and learned need to be revisited and re-conceptualized. **Assessing English**

Language Proficiency in U.S. K-12 Schools Mikyung Kim Wolf, 2020-05-31 *Assessing English Language Proficiency in U.S. K-12 Schools* offers comprehensive background information about the generation of standards-based English language proficiency (ELP) assessments used in U.S. K-12 school settings. The chapters in this book address a variety of key issues involved in the development and use of those assessments: defining an ELP construct driven by new academic content and ELP standards; using technology for K-12 ELP assessments; addressing the needs of various English learner (EL) students; taking the assessments; connecting assessment with teaching and learning; and substantiating validity claims. Each chapter also contains suggestions for future research that will contribute to the next generation of K-12 ELP assessments and improve policies and practices in the use of the assessments. This book is intended to be a useful resource for researchers, graduate students, test developers, practitioners, and policymakers who are interested in learning more about large-scale standards-based ELP assessments for K-12 EL students. Mikyung Kim Wolf, Yuko Goto Butler, 2017-05-25 *English Language Proficiency Assessments for Young Learners* provides both theoretical and empirical information about assessing the English language proficiency of young learners. Using large-scale standardized English language proficiency assessments developed for international or U.S. contexts as concrete examples, this volume illustrates rigorous processes of developing and validating assessments with considerations of young learners' unique characteristics. In this volume, young learners are defined as school-age children from approximately 5 to 13 years old learning English as a foreign language (EFL) or a second language (ESL). This volume also discusses innovative ways to assess young learners' English language abilities based on empirical studies, with each chapter offering stimulating ideas for future research and development work to improve English language assessment practices with young learners. *English Language Proficiency Assessments for Young Learners* is a useful resource for students, test developers, educators, and researchers in the area of language testing and assessment. Knowledge, Curriculum and Equity Brian Barrett, Ursula Hoadley, John Morgan, 2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist post structuralist and postmodernist approaches dominant in the sociology of education The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all

Early Holistic Scoring of Writing Richard Haswell, Norbert Elliot, 2019-11-01 What is the most fair and efficient way to assess the writing performance of students Although the question gained importance during the US educational accountability movement of the 1980s and 1990s the issue had preoccupied international language experts and evaluators long before One answer to the question the assessment method known as holistic scoring is central to understanding writing in academic settings Early Holistic Scoring of Writing addresses the history of holistic essay assessment in the United Kingdom and the United States from the mid 1930s to the mid 1980s and newly conceptualizes holistic scoring by philosophically and reflectively

reinterpreting the genre's origin, development and significance. The book chronicles holistic scoring from its initial origin in the United Kingdom to the beginning of its heyday in the United States. Chapters cover little-known history from the holistic scoring of school certificate examination essays written by Blitz evacuee children in Devon during WWII to teacher adaptations of holistic scoring in California schools during the 1970s. Chapters detail the complications, challenges and successes of holistic scoring from British high-stakes admissions examinations to foundational pedagogical research by Bay Area Writing Project scholars. The book concludes with lessons learned, providing a guide for continued efforts to assess student writing through evidence models. Exploring the possibility of actionable history, *Early Holistic Scoring of Writing* reconceptualizes writing assessment. Here is a new history that retells the origins of our present body of knowledge in writing studies.

The Welsh Language Commissioner in Context Diarmait Mac Golla Chríost, 2016-07-20. It is the first book on the subject. Much of the research data provides a unique insight to the development of government policy and is exclusive to this book. Several of the research results are quite striking and will be of great interest to academics and policy actors alike.

Africa's Lions Haroon Borat, Finn Tarp, 2016-11-08. Examining the economic forces that will shape Africa's future, *Africa's Lions* examines the economic growth experiences of six fast-growing and/or economically dominant African countries. Expert African researchers offer unique perspectives into the challenges and issues in Ethiopia, Ghana, Kenya, Mozambique, Nigeria, and South Africa. Despite a growing body of research on African economies, very little has focused on the relationship between economic growth and employment outcomes at the detailed country level. A lack of empirical data has deprived policymakers of a robust evidence base on which to make informed decisions. By harnessing country-level household firm and national accounts data together with existing analytical country research, the authors have attempted to bridge this gap. The growth of the global working-age population to 2030 will be driven primarily by Africa, which means that the relationship between growth and employment should be understood within the context of each country's projected demographic challenge and the associated implications for employment growth. A better understanding of the structure of each country's workforce and the resulting implications for human capital development, the vulnerably employed, and the working poor will be critical to informing the development policy agenda. As a group, the six countries profiled in *Africa's Lions* will largely shape the continent's future. Each country chapter focuses on the complex interactions between economic growth and employment outcomes within the individual *Africa's Lions* context.

Awakening to China's Rise Hugo Meijer, 2022-08-01. *Awakening to China's Rise* provides the most comprehensive analysis to date of how Europe's major powers have responded to the re-emergence of China as a great power in world politics since the end of the Cold War. To do so, it puts forward a unique cross-regional comparison of how the major European powers, France, Germany, and the United Kingdom, have confronted Chinese assertiveness both in the Asia-Pacific and in Europe. Firstly, it analyses their response to China's increasingly muscular regional posture in the Asia-Pacific through the development of diplomatic and security initiatives with

partners in the region Secondly it delineates how they have confronted China's inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei's 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People's Republic of China have been driven by a naive and self-interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing's growing assertiveness after 2009 caused the three major European powers to awaken to China's rise In the 2010s heightened threat perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments

and policy helps us better understand the policy making process *Media Law and Policy in the Internet Age* Doreen Weisenhaus, Simon N M Young, 2017-02-23 The Internet brings opportunity and peril for media freedom and freedom of expression It enables new forms of publication and extends the reach of traditional publishers but its power increases the potential damage of harmful speech and invites state regulation and censorship as well as manipulation by private and commercial interests In jurisdictions around the world courts lawmakers and regulators grapple with these contradictions and challenges in different ways with different goals in mind The media law reforms they are adopting or considering contain crucial lessons for those forming their own responses or who seek to understand how technology is driving such rapid change in how information and opinion are distributed or restricted In this book many of the world s leading authorities examine the emerging landscape of reform in nations with variable political and legal contexts They analyse developments particularly through the prisms of defamation and media regulation but also explore the impact of technology on privacy law and national security Whether as jurists lawmakers legal practitioners or scholars they are at the front lines of a story of epic change in how and why the Internet is changing the nature and raising the stakes of 21st century communication and expression
