Wolf-Meyer,2020-10-20 Developing a cybernetic model of subjectivity and personhood that honors disability experiences to reconceptualize the category of the human Twentieth century neuroscience fixed the brain as the basis of consciousness the self identity individuality even life itself obscuring the fundamental relationships between bodies and the worlds that they inhabit In *Unraveling* Matthew J Wolf Meyer draws on narratives of family and individual experiences with neurological disorders paired with texts by neuroscientists and psychiatrists to decenter the brain and expose the ableist biases in the dominant thinking about personhood *Unraveling* articulates a novel cybernetic theory of subjectivity in which the nervous system is connected to the world it inhabits rather than being walled off inside the body moving beyond neuroscientific symbolic and materialist approaches to the self to focus instead on such concepts as animation modularity and facilitation It does so through close readings of memoirs by individuals who lost their hearing or developed trauma induced aphasia as well as family members of people diagnosed as autistic texts that rethink modes of subjectivity through experiences with communication caregiving and the demands of everyday life Arguing for a radical antinormative bioethics *Unraveling* shifts the discourse on neurological disorders from such value laden concepts as quality of life to develop an inclusive model of personhood that honors disability experiences and reconceptualizes the category of the human in all of its social technological and environmental contexts **The Sentient Archive** Bill Bissell,Linda Caruso

Presenting a neuroscientifically aware approach to art therapy, *Art Therapy and the Neuroscience of Relationships, Creativity, and Resiliency* offers a comprehensive integration of art therapy and interpersonal neurobiology. It showcases the Art Therapy Relational Neuroscience (ATR N) theoretical and clinical approach and demonstrates how it can be used to help clients with autobiographical memory, reflecting and creating touch and space, meaning-making, emotions, and dealing with long-term stress and trauma. The ATR N approach, first developed by Noah Hass-Cohen, is comprised of six principles: Creative Embodiment, Relational Resonating, Expressive Communicating, Adaptive Responding, Transformative Integrating, and Empathizing and Compassion (CREATE). The chapters in this book are organized around these CREATE principles, demonstrating the dynamic interplay of brain and bodily systems during art therapy. Each chapter begins with an overview of one CREATE principle, which is then richly illustrated with therapeutic artwork and intrapersonal reflections. The subsequent discussion of the related relational neuroscience elucidates how the ATR N work is grounded in research and evidence-based theory. The last section of each chapter, which is devoted to clinical skills and applications, integrates practices and approaches across all six of the CREATE principles, demonstrating how therapeutic art-making can help people decipher the

functional mystery of their relational nervous system enhance their emotive and cognitive abilities and increase the motivation to learn novel concepts and participate in a meaningful social discourse
