Assessment, Treatment, and Prevention of Suicidal Behavior Robert I Yufit, David Lester, 2004-11-03 Current and comprehensive information concerning the assessment and treatment of suicidal persons and the prevention of suicidal behavior The eighth leading cause of death in the United States and the second leading cause among U S teens suicide is unique in being self inflicted and is as such often preventable By assessing the risk of suicide accurately providing effective treatment according

to this risk and implementing strategies against suicidal urges mental health professionals can successfully guide their clients away from this senseless taking of life Assessment Treatment and Prevention of Suicidal Behavior provides the most current and comprehensive source of information guidelines and case studies for working with clients at risk of suicide It offers clinicians counselors and other mental health professionals a practical toolbox on three main areas of interest Screening and Assessment covers empirically based assessment techniques and how they can define dimensions of vulnerability and measure the risk of self destructive behavior Authors discuss research on the use of each screening instrument guidelines and suggestions for using the instrument in practice and a case study illustrating its application Intervention and Treatment compares several different approaches for structuring psychotherapy with suicidal clients Each author covers a psychotherapy system its application to suicidal clients and a case study of its real world use Suicide and Violence explores the relationship between suicidal individuals and violence covering suicide in specific contexts such as school violence police confrontations and terrorist violence This section also includes a discussion of the increased risk of suicide in our more insecure and violent world as well as how to promote coping styles for these new anxieties While addressed mainly to psychologists social workers and other mental health professionals for use in serving their clients as well as students of psychology Assessment Treatment and Prevention of Suicidal Behavior is also an accessible and valuable resource for educators school counselors and others in related fields

Clinician's Handbook of Adult Behavioral

Assessment Michel Hersen, 2011-04-28 Given the vast amount of research related to behavioral assessment it is difficult for clinicians to keep abreast of new developments In recent years there have been advances in assessment case conceptualization treatment planning treatment strategies for specific disorders and considerations of new ethical and legal issues Keeping track of advances requires monitoring diverse resources limited to specific disorders many of which are theoretical rather than practical or that offer clinical advice without providing the evidence base for treatment recommendations This handbook was created to fill this gap summarizing critical information for adult behavioral assessment The Clinician's Handbook of Adult Behavioral Assessment provides a single source for understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are presented in context with the research behind those strategies along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes computerized assessment evaluating older adults behavioral neuropsychology ethical legal issues work related issues and value change in adults with acquired disabilities Suitable for beginning and established clinicians in practice this handbook will provide a

ready reference toward effective adult behavioral assessment **The Practice of Child Therapy** Richard J. Morris, Thomas R. Kratochwill, 2008 Consistent with previous editions this book assembles in a single volume summaries of the treatment literature and treatment procedures of the most common childhood behavior disorders facing persons who practice in applied settings clinics schools counseling centers psychiatric hospitals and residential treatment centers Its 16 chapters cover the historical context of child and adolescent therapy obsessive compulsive disorders childhood depression childhood fears phobias and related anxieties attention deficit hyperactivity disorder academic problems conduct disorder somatic disorders autism spectrum disorder intellectual disabilities children medically at risk sexual and other abuse of children child and adolescent psychopharmacotherapy prevention and child therapy and the law Key features include Treatment Orientation Although some chapters include a discussion of theoretical issues the primary emphasis is on intervention techniques and strategies for changing various behavior and learning problems Case examples are often used to illustrate treatment procedures Empirical Orientation While most authors have adopted a broad based behavioral or cognitive behavioral orientation they were encouraged to review the entire treatment literature and to construct their presentations on the basis of empirically supported treatment techniques and procedures Psychopharmacotherapy Chapter The chapter on child and adolescent psychopharmacotherapy focuses on psychopharmacological interventions rather than on which drugs should be prescribed for specific behavior or learning problems Author Expertise Each chapter is written by experts who are well qualified to discuss treatment practices for the specific topic under discussion This book is intended for individuals who have entered or plan to enter the mental health profession or such related professions as counseling special education nursing and rehabilitation It is especially useful for individuals taking child and adolescent therapy and intervention courses and practicum courses Finally it is suitable for persons who work in applied settings including clinics schools counseling centers psychiatric hospitals and residential treatment centers
