This book is an indispensable basic manual for the real life issues that await us in the decades to come. A treasure trove of practical wisdom. James Howard Kunstler author of *The Geography of Nowhere*. Inside you'll learn: The basics of installing a renewable energy system for your home or business. How to find and sterilize water in the face of utility failure. How to keep warm if you've been left temporarily homeless. Practical information for dealing with water quality issues. Alternative health and first aid techniques. Each chapter describes skills for self-reliance in good times and bad. Chapters include: A survey of the risks to the status quo. Supplies and preparation for short and long term emergencies. Emergency measures for survival. Prepping water, food, shelter and clothing. First aid, low tech medicine and healing. Securing energy, heat and power. Metalworking. Utensils and storage. Low tech chemistry, engineering, machines and materials.
