

Angler: anyone who holds a current Alaska sportfishing license to engage in sportfishing and/or personal use fishing in 2007, dipnetters and shellfish fishermen included. Only the economic effects of sport and personal use fishing (e.g., dipnetting) are captured in this study.

PID: Alaska residents 60 or older are not required to purchase sportfishing licenses, but can apply for an ADF&G Permanent Identification Card (PID). These are free lifetime hunting, fishing, and trapping licenses valid for the remainder of the recipient's life.

DAV: a disabled American veteran license allowing participation in sport and personal use fishing, hunting, and trapping in Alaska

Economic contribution: the total economic activity resulting from expenditures made by resident and nonresident anglers. In other studies, this is sometime termed economic significance or economic importance.

Economic impacts: the effects from nonresident anglers whose expenditures within Alaska represent new dollars or dollars that would otherwise be lost to the state economy.

Economic impacts versus economic contribution: in many circles, there is a difference between these terms. Economic impact typically refers to the new economic activity created within a defined region from dollars originating from outside the region. This includes the dollars brought into Alaska by nonresident anglers, or the dollars brought in by businesses from sales to people and businesses outside of the region. Economic contribution relates to the total economic activity within a region. This would include expenditures by residents and businesses selling to people within the region. In theory, if these dollars were not spent on sportfishing within the region, they would be spent on other activities within the region and therefore would still stimulate economic activity. It is not possible to accurately predict if people would spend dollars within or outside of the region if sportfishing were not available. This study includes both economic impact estimates (nonresidents) as well as economic significance (resident-based) estimates.

Angler Expenditures: the dollars spent for the primary reason of sportfishing. Such expenditures include travel-related expenses for fishing, fishing tackle and other fishing equipment, ancillary equipment that may have multiple uses including supporting the angler's sportfishing activities (e.g., coolers, binoculars), and development and management expenditures for real estate used primarily for the pursuit of sportfishing.

Economic Multipliers: the response of a regional economy to some economic stimulus, such as spending by anglers.

Direct effect: the changes in the businesses that are directly affected by angler spending. In the case of consumer purchases, some products are supplied by businesses and industries from outside of the region and the direct effect does not necessarily equal total consumer spending. These direct expenditures initiate other rounds of activity within the economy.

Indirect effect: the changes in inter-industry purchases as suppliers respond to the new demands of those businesses that are directly affected by the angler spending.

Induced effect: the economic activity that results from household spending of labor income associated with the economic activity generated by the direct and indirect effects.

Economic Activity: the various metrics that are used to represent the ways in which angler expenditures affect a regional economy. Each of the metrics can be used as measures of the direct, indirect or induced effects.

Output: the total value of an industry's production. Included in output is the value of an industry's inputs plus value added by the industry (payroll, profits, and indirect business taxes).

Income: total payroll, including salaries and wages, as well as benefits such as insurances, retirement benefits paid to employees and business proprietors.

Employment: the total number of both full-time and part-time jobs.

Tax revenues: estimates of all local, state and federal taxes paid by individuals and business (e.g., income taxes, excise taxes, business profits taxes, payroll taxes).
