Before You Begin

Battery Pack Installation and Removal

- To install the battery, hold the transmitter with your left hand, so your palm is over the speaker and your thumb is on the top of the belt clip. Insert the battery pack into the battery compartment on the back of the radio while sliding the Belt Clip outward. Then close the Battery Pack Latch with 4 clicks in place with a "Click."

- To remove the battery, turn the radio off and remove any antenna cover. Open the Battery Pack latch on the bottom of the radio, then slide the battery downward and out from the radio while holding the Belt Clip.

Caution!

Do not attempt to open any of the rechargeable Ni-Cd packs, as they could explode if accidentally short-circuited.

Low Battery Indication

- As the battery discharges during use, the voltage gradually becomes lower. When the battery voltage reaches 8.0 volts, indicate a freshly charged battery and recharge the depleted pack. The **VB BATT** indicator on the top of the radio will blink, and on the VX-180 the **CH** icon will appear on the LCD when the battery voltage is low.
- After recharging the Ni-Cd batteries return with little or no memory charge, so this can degrade the charge capacity. We recommend that you empty an empty fully-charged pack with power to the operational battery may be used until depletion after "deep cycling" recharges provides better long-term battery capacity.

Operation

Preliminary Steps

- Insert a charged battery pack into the transmitter, as described previously.
- Turn the supplied antenna into the antenna jack. Never attempt to operate this transmitter without an antenna connected.
- If you have a Speaker/Microphone, an extension that it not be connected until you are familiar with the basic operation of the VX-160/180.

Operation Quick Start

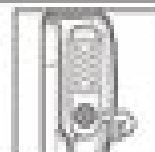

- Turn the top power **VOL/PWR** back clockwise to turn on the radio on.

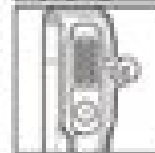

- Turn the top power **CH** selector back to choose the desired operating channel.

- Answer the **VOL/PWR** back to set the volume level. If an alarm is present, press clockwise on the **MONITOR** key the lowest volume on the left side for more than 1 second. The green noise will turn to beak and you may say this to set the **VOL/PWR** back to the desired volume level.

- Press and hold on the **MONITOR** key for more than 1 second to place the **MONITOR** key in order to quiet the beak and increase selected channel monitoring.

- To transmit, press and hold on the **PTT** button. Repeat after the microphone one of the four panel push (down) left hand controls in a normal voice level. To return to the Receive mode, release the **PTT** button.

- If a Speaker/Microphone is available, remove the plastic cap and use the connecting wires from the right side of the transmitter, then insert the plug from the Speaker/Microphone into the **MIC/SP** jack. Insert the plug using the wires supplied with the Speaker/Microphone. Hold the speaker cable up so that you can hold monitoring. To transmit, press the **PTT** button on the Speaker/Microphone, just as you would on the main transmitter's body.

Note: Save the original plastic cap and its connecting wires. They should be re-installed when not using the Speaker/Microphone.
