Economists' Mathematical Manual Peter Berck, Knut Sydsaeter, 2013-03-09 The practice of economics requires a wide ranging knowledge of formulas from mathematics and mathematical economics The selection of results from mathematics included in handbooks for chemistry and physics ill suits economists There is no concise reporting of results in economics With this volume we hope to

present a formulary targeted to the needs of students as well as the working economist. It grew out of a collection of mathematical formulas for economists originally made by Professor B. Thalberg and used for many years by Scandinavian students and economists. The formulary has 32 chapters covering calculus and other often used mathematical programming and optimization theory, economic theory of the consumer and the firm, risk finance and growth theory, non-cooperative game theory and elementary statistical theory. The book contains just the formulas and the minimum commentary needed to relearn the mathematics involved. We have endeavored to state theorems at the level of generality economists might find useful. By and large we state results for n -dimensional Euclidean space even when the results are more generally true. In contrast to the economic maxim everything is twice more continuously differentiable than it needs to be, we have listed the regularity conditions for theorems to be true. We hope that we have achieved a level of explication that is accurate and useful without being pedantic.

Ensley, J. Winston Crawley, 2005-10-07. These active and well-known authors have come together to create a fresh, innovative and timely approach to Discrete Math. One innovation uses several major threads to help weave core topics into a cohesive whole. Throughout the book, the application of mathematical reasoning is emphasized to solve problems while the authors guide the student in thinking about reading and writing proofs in a wide variety of contexts. Another important content thread, as the sub-title implies, is the focus on mathematical puzzles, games and magic tricks to engage students.
