Chapter 3

Lesson 3-1

Use the cube to name each of the following.

- all lines that are parallel to \overline{BC} **\overline{AD} , \overline{EH} , \overline{FG}**
- a pair of parallel planes **sample answers: plane ABC and plane EFG , or plane AEH and plane BCG**
- two lines that are skew to \overline{AE} **sample answer: \overline{BC} , \overline{HG}**

Identify all pairs of each type of angles in the diagram.

Name the two lines and the transversal that form each pair.

- corresponding angles **$\angle 5$ and $\angle 7$; d , e , and b**
- alternate interior angles **$\angle 1$ and $\angle 3$; b , c , and a , $\angle 2$ and $\angle 4$; d , e , and a**
- same-side interior angles **$\angle 7$ and $\angle 8$; b , c , and d**
- alternate exterior angles **$\angle 6$ and $\angle 7$; d , e , and b**

Lesson 3-2

Find $m\angle 1$ and $m\angle 2$. State the theorems or postulates that justify your answers.

**$m\angle 1 = 134$; Same-Side Int. \angle Thm.
 $m\angle 2 = 46$; Alt. Int. \angle Thm.**

**$m\angle 1 = 125$; Corr. \angle Post.
 $m\angle 2 = 55$; Same-Side Int. \angle Thm.**

**$m\angle 1 = 58$; Alt. Int. \angle Thm.
 $m\angle 2 = 122$; Same-Side Int. \angle Thm.**

**$m\angle 1 = 64$; Alt. Int. \angle Thm.
 $m\angle 2 = 116$; Same-Side Int. \angle Thm.**

**$m\angle 1 = 103$; Corr. \angle Post.
 $m\angle 2 = 103$; Alt. Ext. \angle Thm.**

**$m\angle 1 = 82$; Same-Side Int. \angle Thm.
 $m\angle 2 = 82$; Alt. Ext. \angle Thm.**

Find the value of each variable. Then find the measure of each labeled angle.

$x = 45$, $x + 15 = 2x - 30 = 60$

**$x = 62$, $(3x - 44) = 142$,
 $(x - 24) = 38$**

**$x = 17$, $y = 35$;
 $5x = (3x + 34) = 85$,
 $2y = (2y - 35) = 70$**

Test Fairness in the New Generation of Large-Scale Assessment Hong Jiao, Robert W. Lissitz, 2017-06-01 The new generation of tests is faced with new challenges In the K 12 setting the new learning targets are intended to assess higher order thinking skills and prepare students to be ready for college and career and to keep American students competitive with their international peers In addition the new generation of state tests requires the use of technology in item delivery and embedding assessment in real world authentic situations It further requires accurate assessment of students at all ability levels One of the most important questions is how to maintain test fairness in the new assessments with technology innovative items and technology delivered tests In the traditional testing programs such as licensure and certification tests and college admission tests test fairness has constantly been a key psychometric issue in test development and this continues to be the case with the national testing programs As test fairness needs to be addressed throughout the whole process of test development experts from state admission and licensure tests

will address test fairness challenges in the new generation assessment The book chapters clarify misconceptions of test fairness including the use of admission test results in cohort comparison the use of international assessment results in trend evaluation whether standardization and fairness necessarily mean uniformity when test takers have different cultural backgrounds and whether standardization can insure fairness More technically chapters also address issues related to how compromised items and test fairness are related to classification decisions how accessibility in item development and accommodation could be mingled with technology how to assess special populations with dyslexia using Blinder Oaxaca Decomposition for differential item functioning detection and differential feature functioning in automated scoring Overall this book addresses test fairness issues in state assessment college admission testing international assessment and licensure tests Fairness is discussed in the context of culture and special populations Further fairness related to performance assessment and automated scoring is a focus as well This book provides a very good source of information related to test fairness issues in test development in the new generation of assessment where technology is highly involved **CISSP**

Why cant U teach me 2 read? Beth Fertig, 2009-09-15 *Why cant U teach me 2 read* is a vivid stirring passionately told story of three students who fought for the right to learn to read and won only to discover that their efforts to learn to read had hardly begun A person who cannot read cannot confidently ride a city bus shop take medicine or hold a job much less receive e mail follow headlines send text messages or write a letter to a relative And yet the best minds of American education cannot agree on the right way for reading to be taught In fact they can hardly settle on a common vocabulary to use in talking about reading As a result for a quarter of a century American schools have been riven by what educators call the reading wars and our young people have been caught in the crossfire *Why cant U teach me 2 read* focuses on three such students Yamilka Alejandro and Antonio all have learning disabilities and all legally challenged the New York City schools for failing to teach them to read by the time

they got to high school When the school system's own hearing officers ruled in the students favor the city was compelled to pay for the three students now young adults to receive intensive private tutoring Fertig tells the inspiring heartbreaking stories of these three young people as they struggle to learn to read before it is too late At the same time she tells a story of great change in schools nationwide where the crush of standardized tests and the presence of technocrats like New York's mayor Michael Bloomberg and his schools chancellor Joel Klein have energized teachers and parents to question the meaning of education as never before And she dramatizes the process of learning to read showing how the act of reading is nothing short of miraculous Along the way Fertig makes clear that the simple question facing students and teachers alike How should young people learn to read opens onto the broader questions of what schools are really for and why so many of America's schools are faltering Why can't U teach me 2 read is a poignant vital book for the reader in all of us **GED** Seymour Barasch, Barbara Hull, Ronald Kappraff, 1992-02 Reviews math social studies science and reading and writing skills and provides three sample tests with answers explained European Theatre Performance Practice, 1400-1580 Philip Butterworth, 2017-03-02 This volume brings together important records of medieval theatre practice between 1400 and 1580 The records are drawn from a wide range of spheres including civic ecclesiastical trade and guild records and consist of payments for materials techniques and services also included are some eye witness accounts Alongside these records is a selection of the best contemporary research conducted into medieval performance practice which features ground breaking analysis and challenges current understanding knowledge and authority in this field These contributions of rigorous scholarship complement and support the work of the well known Records of Early English Drama project and help to further illuminate contemporary fifteenth and early sixteenth century theatre performance practice The Myth of Achievement Tests James J. Heckman, John Eric Humphries, Tim Kautz, 2014-01-14 Achievement tests play an important role in modern societies They are used to evaluate schools to assign students to tracks within schools and to identify weaknesses in student knowledge The GED is an achievement test used to grant the status of high school graduate to anyone who passes it GED recipients currently account for 12 percent of all high school credentials issued each year in the United States But do achievement tests predict success in life The Myth of Achievement Tests shows that achievement tests like the GED fail to measure important life skills James J Heckman John Eric Humphries Tim Kautz and a group of scholars offer an in depth exploration of how the GED came to be used throughout the United States and why our reliance on it is dangerous Drawing on decades of research the authors show that while GED recipients score as well on achievement tests as high school graduates who do not enroll in college high school graduates vastly outperform GED recipients in terms of their earnings employment opportunities educational attainment and health The authors show that the differences in success between GED recipients and high school graduates are driven by character skills Achievement tests like the GED do not adequately capture character skills like conscientiousness perseverance sociability and curiosity These skills are important in predicting a

variety of life outcomes They can be measured and they can be taught Using the GED as a case study the authors explore what achievement tests miss and show the dangers of an educational system based on them They call for a return to an emphasis on character in our schools our systems of accountability and our national dialogue Contributors Eric Grodsky University of Wisconsin Madison Andrew Halpern Manners Indiana University Bloomington Paul A LaFontaine Federal Communications Commission Janice H Laurence Temple University Lois M Quinn University of Wisconsin Milwaukee Pedro L Rodriguez Institute of Advanced Studies in Administration John Robert Warren University of Minnesota Twin Cities
