rural areas and work in agriculture Through the links via production trade employment and prices agricultural production is also crucial for national food security Second it has been shown that agriculture in developing countries has important growth and employment multipliers for the rest of the economy and agriculture seems to have larger positive effects in reducing poverty than growth in other sectors Third agriculture is not only important for individual developing countries but it has global significance considering the large presence of developing countries in world agricultural production and the increasing participation in international trade of those products these three points will be covered in greater detail in Chapter 1
