Dynamic Equations on Time Scales Martin Bohner, Allan Peterson, 2012-12-06 On becoming familiar with difference equations and their close relation to differential equations I was in hopes that the theory of difference equations could be brought completely abreast with that for ordinary differential equations HUGH L TURRITTIN *My Mathematical Expectations* Springer Lecture Notes 312 page 10 1973 A major task of mathematics today is to harmonize the continuous and the discrete

to include them in one comprehensive mathematics and to eliminate obscurity from both E T BELL Men of Mathematics Simon and Schuster New York page 13 14 1937 The theory of time scales which has recently received a lot of attention was introduced by Stefan Hilger in his PhD thesis 159 in 1988 supervised by Bernd Aulbach in order to unify continuous and discrete analysis This book is an introduction to the study of dynamic equations on time scales Many results concerning differential equations carryover quite easily to corresponding results for difference equations while other results seem to be completely different in nature from their continuous counterparts The study of dynamic equations on time scales reveals such discrepancies and helps avoid proving results twice once for differential equations and once for difference equations The general idea is to prove a result for a dynamic equation where the domain of the unknown function is a so called time scale which is an arbitrary nonempty closed subset of the reals El-Hi Textbooks in Print ,1981 Books In Print 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004 *Catalog of Copyright Entries.
