ArtOfTesting.com

## Requirement Understanding

This is the most vital part of the process as the very basis of the whole testing relies on this phase.

## Test Planning and Test Strategy

A document containing the scope and objective of testing is defined (Test Plan) along with deciding some principles that will define how testing will be carried out (Test Strategy).

## Test case creation

After test planning and test strategy, we prepare test cases based on the functional and non-functional requirements of the application.

## Test case execution and Defect logging

During test case execution each test case is marked as pass-fail and defects are raised for each failure.

## Retesting and regression

After the bug fixing by developers, we retest the bug fixes and also do regression testing.

## Test report sharing

The test results are shared with the relevant stakeholders along with a set of known issues, if any.
