

Welcome to System Restore

You can use System Restore to undo harmful changes to your computer and restore its settings and performance. System Restore returns your computer to an earlier time (called a restore point) without causing you to lose recent work, such as saved documents, e-mail, or history and favorites lists.

Any changes that System Restore makes to your computer are completely reversible.

Your computer automatically creates restore points (called system checkpoints), but you can also use System Restore to create your own restore points. This is useful if you are about to make a major change to your system, such as installing a new program or changing your registry.

[System Restore Settings](#)

To begin, select the task that you want to perform:

- ☒ Restore my computer to an earlier time
- ☐ Create a restore point

To continue, select an option, and then click Next.
