Large-Scale Grid-Connected Wind and Photovoltaic Farms Wei Yao, Yongxin Xiong, Hongyu Zhou, Jinyu Wen, 2025-05-29 This book provides a comprehensive study of the modeling analysis and control of wind farms and solar power stations It starts with dynamic vector modeling methods for wind farms and solar power stations which enhance modeling efficiency and model accuracy Building upon this modeling framework it also covers stability analysis and control methods for wind farms and solar power stations from both steady state and transient perspectives Lastly considering the integration of energy storage into renewable energy power stations the book explores the analysis and control of wind energy storage and solar energy storage hybrid systems It adopts a holistic approach establishing a fundamental framework for the topic progressing from modeling to analysis and then to control facilitating readers comprehension The book is targeted towards undergraduate and graduate students interested in renewable energy power stations researchers focusing on station level modeling analysis and control of renewable energy as well as engineers in the field *Novel Technologies in the Diagnosis and Management of Sleep-disordered Breathing* Henri Korkalainen, Ding Zou, 2024-03-13 Sleep disordered breathing ranging from habitual snoring to severe obstructive sleep apnea is highly prevalent and represents a growing

global healthcare burden Besides disrupting sleep sleep disordered breathing leads to detrimental outcomes such as excessive daytime sleepiness neurocognitive impairment and increased cardiometabolic morbidities The gold standard diagnostic procedures e g in lab polysomnography are cumbersome and standard parameters derived from sleep studies often yield poor long term prognostic value Hence there is a need for innovative diagnostic technologies and novel sleep metrics to enable simple diagnosis and tailored disease management

Intergenerational Wellbeing and Public Policy

Girol Karacaoglu,Jacek B. Krawczyk,Anita King,2019-01-28 The distinctive contribution of this book is the formulation of an integrated social environmental and economic framework for public policy This contribution is realised through investigations and conclusions in the following four domains a formal stylised model that provides a platform for an integrated approach to public policy a policy informing simulation model that can be used to operationalise the public policy insights proposed in the stylised model the implications of introducing fundamental or radical uncertainty and complexity into the policy framework and the use of viability theory to demonstrate how one can think of and implement public policy in an uncertain and complex world when the focus of policy needs to shift to building resilience to systemic risks The book s stylised model is constructed by weaving together threads from the wellbeing human needs complex systems sustainable development endogenous economic growth directed technical change and credit based money literatures Throughout the perspective is that of a policy adviser to a wellbeing state as distinct from a welfare state The key linkages or relationships in the model are supported by empirical evidence that draws on the wider literature in related fields
