

The book cover features a diagonal split. The upper-left portion is a black and white photograph of Albert Einstein, looking upwards and to the right, with his right hand raised towards a chalkboard. On the chalkboard, the equation $R_{ik} - \frac{1}{2}Rg_{ik} = 0$ is written in chalk. The lower-right portion is a black and white photograph of a man in a dark suit and tie, sitting at a desk with papers, resting his head on his hand in a contemplative pose. A teal diagonal band runs from the bottom-left to the top-right, containing the title and subtitle in white text.

Modes Of Explanation Affordances For Action And Prediction:

Modes of Explanation M. Lissack,A. Graber,2014-12-16 Modes of Explanation is the first book in decades to attempt to bring these conflicting approaches together and to offer a compelling narrative to explore how the paradox of explanation can converge

Performing Complexity: Building Foundations for the Practice of Complex Thinking Ana Teixeira de Melo,2020-04-28 In the face of growing challenges we need modes of thinking that allow us to not only grasp complexity but also perform it In this book the author approaches complexity from the standpoint of a relational worldview The author recasts complex thinking as a mode of coupling between an observer and the world Further she explores the process and outcome of that coupling namely meaningful information that may have transformative effects and impact the management of change in the real world The author presents a new framework for operationalising complex thinking in a set of dimensions and properties through which it may be enacted This framework may inform the development and coordination of new tools and strategies to support the practice and evaluation of complex thinking across a variety of domains Intended for a wide interdisciplinary audience of academics practitioners and policymakers alike the book is an invitation to pursue inter and transdisciplinary dialogues and collaborations

Performing Metaphoric Creativity across Modes and Contexts Laura Hidalgo-Downing,Blanca Kraljevic Mujic,2020-06-15 The creative potentiality of metaphor is one of the central themes in research on creativity The present volume offers a space for the interdisciplinary discussion of the relationship between metaphor and creativity by focusing on re contextualization across modes and socio cultural contexts and on the performative dimension of creative discourse practices The volume brings together insights from Conceptual Metaphor Theory Critical Discourse approaches to metaphor and Multimodal discourse analysis Creativity as a process is explored in how it emerges in the flow of experience when talking about or reacting to creative acts such as dance painting or music and in subjects responses to advertisements in experimental studies Creativity as product is explored by analyzing the choice occurrence and patterning of creative metaphors in various types of multimodal and multisensorial discourses such as political cartoons satire films children s storybooks music and songs videos scientific discourse architectural reviews and the performance of classical Indian rasa

The Oxford Handbook of Human Symbolic Evolution Nathalie Gontier,Andy Lock,Chris Sinha,2024 The Oxford Handbook of Human Symbolic Evolution explores the origins of our characteristically human abilities our ability to speak create images play music and read and write The book investigates how symbolization evolved in human evolution and how symbolism is expressed across the various areas of human life

Reframing Critical, Literary, and Cultural Theories Nicoletta Pireddu,2018-09-04 This book participates in the ongoing debate about the alleged death of theory and the current post theoretical condition arguing that the finitude of theoretical projects does not mean end but rather contingency and transformation of thinking beyond irreconcilable doctrines Contributors from different cultural and scholarly backgrounds and based in three different continents propose new areas of investigation and interpretive

possibilities reopening dialogues with past and present discourses from a plurality of perspectives and locations After a first section that reassesses the status and scopes of critique theory and literature the book foregrounds new or neglected critical vocabulary literary paradigms and narrative patterns to reread texts at the intersection with other branches of the humanities history philosophy religion and pedagogy It then explores geopolitical cultural and epistemological domains that have been historically and ideologically overdetermined such as postsocialist postcolonial and cosmopolitan spaces recodifying them as unstable sites of both conflicts and convergences By acknowledging the spatio temporal and cultural delimitations of any intellectual practice the book creates awareness of our own partiality and incompleteness but treats boundaries as zones of contact exchange and conceptual mobility that promote crossings and connections Living without God: A Multicultural Spectrum of Atheism Sanjit Chakraborty,Anway Mukhopadhyay,2022-11-16 This book deals with the intricate issue of approaching atheism methodologically as well as conceptually from the perspective of cultural pluralism What does atheism mean in different cultural contexts Can this term be applied appropriately to different religious discourses which conceptualize God gods Goddess goddesses and also godlessness in hugely divergent ways Is my God the same as yours If not then how can your atheism be the same as mine In other words this volume raises the question Is it not high time that we proposed a comparative study of atheism s alongside that of religions rather than believing that atheism is centered in the Western experience Apart from answering these questions the book highlights the much needed focus on the philosophical negotiations between atheism theism and agnosticism The fine chapters collected here present pluralist negotiations with the notion of atheism and its ethical theological literary and scientific corollaries Previously published in Sophia Volume 60 issue 3 September 2021 Chapters Religious Conversion and Loss of Faith Cases of Personal Paradigm Shift and On Being an Infidel are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) *Contemporary Natural Philosophy and Philosophies - Part 1* Gordana Dodig-Crnkovic,Marcin J. Schroeder,2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal Philosophies to build a new networked world of knowledge with domain specialists from different disciplines interacting and

connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world both natural and human made while philosophies scrutinize the ontological epistemological and methodological foundations of sciences providing scientists with questions and conceptual analyses This is all directed at extending and deepening our existing comprehension of the world including ourselves both as humans and as societies and humankind *From Canon to Covid* Angelie Multani, Swati Pal, Nandini Saha, Albeena Shakil, Arjun Ghosh, 2023-08-31 This multi genre collection of chapters presents the dramatic transformation of English Studies in India since the early 1990s It showcases the shift from the study of mainly British literature and language to a more versatile terrain of multilingualism culture performance theory and the literary Global South Tracing this transition the volume discusses themes like Indian literary history postcolonial theory post pandemic challenges to literary studies the state of Indian English drama vernacular literature in English Studies and pedagogy translations of feminist writers from South Asia caste and othering in literature among other key themes The volume with contributions from eminent English Studies scholars not only reflects the altered terrain of English Language and Literature in India but also invites readers to think about the transformative potential of the present juncture for both literary imagination and literary studies This timely book in honour of Professor GJV Prasad will be of interest to scholars and researchers of English Studies cultural studies literature comparative literature translation studies postcolonial studies and critical theory **New Horizons For Second-order Cybernetics** Alexander Riegler, Karl H Muller, Stuart A Umpleby, 2017-09-15 In almost 60 articles this book reviews the current state of second order cybernetics and investigates which new research methods second order cybernetics can offer to tackle wicked problems in science and in society The contributions explore its application to both scientific fields such as mathematics psychology and consciousness research and non scientific ones such as design theory and theater science The book uses a pluralistic multifaceted approach to discuss these applications Each main article is accompanied by several commentaries and author responses which together allow the reader to discover further perspectives than in the original article alone This procedure shows that second order cybernetics is already on its way to becoming an idea shared by many researchers in a variety of disciplines **Wicked Valuations** Michael McDermott, 2018-07-16 Traditional valuation approaches are increasingly recognised as being insufficient to address the wicked valuation problems of the diverse peoples and groups that inhabit the globe from north south east to west This book demonstrates the limitations of science and in particular economics as the foundation on which valuations are traditionally based It demonstrates the importance of and provides justification for the personal cultural values and norms which underpin our assessment of value and the fact that these vary across the world In *Wicked Valuations* Michael McDermott develops a means of engaging with highly complex valuation problems His autoethnography provides a lens to

draw on knowledge and experience from his 40 years in land valuation in Africa and the Asia Pacific while documentary analysis is used to draw in the views of other valuation practitioners and scholars who are becoming increasingly aware of the need to develop ways to adapt land valuation processes to the complexity of our contemporary landscapes
